

Trane Technologies

# 2025 CDP Corporate Questionnaire 2025

## C1. Introduction

### (1.1) In which language are you submitting your response?

Select from:

English

### (1.2) Select the currency used for all financial information disclosed throughout your response.

Select from:

USD

### (1.3) Provide an overview and introduction to your organization.

#### (1.3.2) Organization type

Select from:

Publicly traded organization

#### (1.3.3) Description of organization

*Trane Technologies plc, a public limited company, incorporated in Ireland in 2009, and its consolidated subsidiaries (collectively we, us, our, the Company) is a global climate innovator. We bring sustainable and efficient solutions to buildings, homes and transportation through our strategic brands, Trane and Thermo King, and our environmentally responsible portfolio of products, services and connected intelligent controls. We generate revenue and cash primarily through the design, manufacture, sales and service of solutions for Heating, Ventilation and Air Conditioning (HVAC), transport refrigeration, and custom refrigeration solutions. As an industry leader with an extensive global install base, our growth strategy includes expanding recurring revenue through services and rental options. Our unique business operating system, uplifting culture and highly engaged team around the world are also central to our earnings and cash flow growth. Through our sustainability-focused strategy and purpose to boldly challenge what's possible for a sustainable world, we meet critical needs and growing global demand for innovation that reduces greenhouse gas emissions while enabling healthier, efficient indoor environments and safe, reliable delivery of essential temperature-controlled cargo. We have announced certain defined sustainability commitments with a goal of achieving these commitments by 2030 (2030 Sustainability Commitments). Trane Technologies' 2030 Sustainability Commitments include our 'Gigaton Challenge' to reduce customer greenhouse gas emissions by a billion metric tons; 'Leading by Example' through reducing embodied carbon by 40%, and designing products for circularity; and creating 'Opportunity for All' by investing in our people and our communities.*

[Fixed row]

**(1.4) State the end date of the year for which you are reporting data. For emissions data, indicate whether you will be providing emissions data for past reporting years.**

	End date of reporting year	Alignment of this reporting period with your financial reporting period	Indicate if you are providing emissions data for past reporting years
	12/31/2024	Select from: <input checked="" type="checkbox"/> Yes	Select from: <input checked="" type="checkbox"/> No

[Fixed row]

**(1.4.1) What is your organization's annual revenue for the reporting period?**

19838200000

**(1.5) Provide details on your reporting boundary.**

	Is your reporting boundary for your CDP disclosure the same as that used in your financial statements?
	Select from: <input checked="" type="checkbox"/> Yes

[Fixed row]

**(1.6) Does your organization have an ISIN code or another unique identifier (e.g., Ticker, CUSIP, etc.)?**

**ISIN code - bond**

**(1.6.1) Does your organization use this unique identifier?**

Select from:

No

**ISIN code - equity**

**(1.6.1) Does your organization use this unique identifier?**

Select from:

Yes

**(1.6.2) Provide your unique identifier**

IE00BK9ZQ967

**CUSIP number**

**(1.6.1) Does your organization use this unique identifier?**

Select from:

Yes

**(1.6.2) Provide your unique identifier**

G8994E

**Ticker symbol**

**(1.6.1) Does your organization use this unique identifier?**

Select from:

Yes

**(1.6.2) Provide your unique identifier**

TT

## SEDOL code

**(1.6.1) Does your organization use this unique identifier?**

Select from:

No

## LEI number

**(1.6.1) Does your organization use this unique identifier?**

Select from:

No

## D-U-N-S number

**(1.6.1) Does your organization use this unique identifier?**

Select from:

No

## Other unique identifier

**(1.6.1) Does your organization use this unique identifier?**

Select from:

No

[Add row]

**(1.7) Select the countries/areas in which you operate.**

Select all that apply

- China
- Italy
- Spain
- Brazil
- Canada
- Thailand
- Puerto Rico
- Saudi Arabia
- United States of America
- United Kingdom of Great Britain and Northern Ireland

- France
- Mexico
- Czechia
- Germany
- Ireland

### (1.8) Are you able to provide geolocation data for your facilities?

	Are you able to provide geolocation data for your facilities?	Comment
	Select from: <input checked="" type="checkbox"/> No, this is confidential data	<i>We currently do not provide geolocation data for all facilities.</i>

[Fixed row]

### (1.24) Has your organization mapped its value chain?

#### (1.24.1) Value chain mapped

Select from:

- Yes, we have mapped or are currently in the process of mapping our value chain

#### (1.24.2) Value chain stages covered in mapping

Select all that apply

- Upstream value chain
- Downstream value chain

### (1.24.3) Highest supplier tier mapped

Select from:

- Tier 1 suppliers

### (1.24.4) Highest supplier tier known but not mapped

Select from:

- Tier 2 suppliers

### (1.24.7) Description of mapping process and coverage

*We regularly conduct a value chain mapping process to help us understand where risks and opportunities arise in our value chain.*

*[Fixed row]*

### (1.24.1) Have you mapped where in your direct operations or elsewhere in your value chain plastics are produced, commercialized, used, and/or disposed of?

	Plastics mapping	Primary reason for not mapping plastics in your value chain	Explain why your organization has not mapped plastics in your value chain
	Select from: <input checked="" type="checkbox"/> No, but we plan to within the next two years	Select from: <input checked="" type="checkbox"/> No standardized procedure	<i>We have not began conducting a value chain mapping specific to plastics.</i>

*[Fixed row]*

## **C2. Identification, assessment, and management of dependencies, impacts, risks, and opportunities**

**(2.1) How does your organization define short-, medium-, and long-term time horizons in relation to the identification, assessment, and management of your environmental dependencies, impacts, risks, and opportunities?**

### **Short-term**

**(2.1.1) From (years)**

1

**(2.1.3) To (years)**

3

**(2.1.4) How this time horizon is linked to strategic and/or financial planning**

*This time horizon is aligned with our strategic and financial planning.*

### **Medium-term**

**(2.1.1) From (years)**

3

**(2.1.3) To (years)**

10

**(2.1.4) How this time horizon is linked to strategic and/or financial planning**

*This time horizon is aligned with our strategic and financial planning.*

## Long-term

### (2.1.1) From (years)

10

### (2.1.2) Is your long-term time horizon open ended?

Select from:

No

### (2.1.3) To (years)

30

### (2.1.4) How this time horizon is linked to strategic and/or financial planning

*This time horizon is aligned with our strategic and financial planning.*

*[Fixed row]*

## (2.2) Does your organization have a process for identifying, assessing, and managing environmental dependencies and/or impacts?

	Process in place	Dependencies and/or impacts evaluated in this process
	Select from: <input checked="" type="checkbox"/> Yes	Select from: <input checked="" type="checkbox"/> Both dependencies and impacts

*[Fixed row]*

**(2.2.1) Does your organization have a process for identifying, assessing, and managing environmental risks and/or opportunities?**

	Process in place	Risks and/or opportunities evaluated in this process	Is this process informed by the dependencies and/or impacts process?
	Select from: <input checked="" type="checkbox"/> Yes	Select from: <input checked="" type="checkbox"/> Both risks and opportunities	Select from: <input checked="" type="checkbox"/> Yes

[Fixed row]

**(2.2.2) Provide details of your organization’s process for identifying, assessing, and managing environmental dependencies, impacts, risks, and/or opportunities.**

**Row 1**

**(2.2.2.1) Environmental issue**

Select all that apply

- Climate change

**(2.2.2.2) Indicate which of dependencies, impacts, risks, and opportunities are covered by the process for this environmental issue**

Select all that apply

- Dependencies
- Impacts
- Risks
- Opportunities

### (2.2.2.3) Value chain stages covered

*Select all that apply*

- Direct operations
- Upstream value chain
- Downstream value chain
- End of life management

### (2.2.2.4) Coverage

*Select from:*

- Full

### (2.2.2.5) Supplier tiers covered

*Select all that apply*

- Tier 1 suppliers

### (2.2.2.7) Type of assessment

*Select from:*

- Qualitative and quantitative

### (2.2.2.8) Frequency of assessment

*Select from:*

- Annually

### (2.2.2.9) Time horizons covered

*Select all that apply*

- Short-term
- Medium-term
- Long-term

### (2.2.2.10) Integration of risk management process

Select from:

- Integrated into multi-disciplinary organization-wide risk management process

### (2.2.2.11) Location-specificity used

Select all that apply

- Site-specific
- Local
- National

### (2.2.2.12) Tools and methods used

Enterprise Risk Management

- Enterprise Risk Management
- Internal company methods

International methodologies and standards

- Life Cycle Assessment

Databases

- Nation-specific databases, tools, or standards

Other

- Scenario analysis

### (2.2.2.13) Risk types and criteria considered

Acute physical

- Drought
- Wildfires
- Heat waves
- Flood (coastal, fluvial, pluvial, ground water)

- Cold wave/frost
- Heavy precipitation (rain, hail, snow/ice)

#### Chronic physical

- Changing precipitation patterns and types (rain, hail, snow/ice)
- Changing temperature (air, freshwater, marine water)
- Water stress

#### Policy

- Carbon pricing mechanisms
- Changes to international law and bilateral agreements
- Changes to national legislation

#### Market

- Changing customer behavior

#### Reputation

- Other reputation, please specify :Integrated into Enterprise Risk Intelligence using the description: The risk that actual or perceived incidents or actions (e.g. environmental damage) at Trane Technologies may lead to reputation or brand damage.

#### Technology

- Transition to lower emissions technology and products

#### Liability

- Other liability, please specify :For Trane Technologies, because our biggest climate-related impact is from the energy and refrigerant use of our products,, we address both future and current legal risk under current and emerging regulation.

### **(2.2.2.14) Partners and stakeholders considered**

*Select all that apply*

- Customers
- Employees
- Investors

Local communities

### (2.2.2.15) Has this process changed since the previous reporting year?

Select from:

No

### (2.2.2.16) Further details of process

*Trane Technologies Enterprise Risk Intelligence Committee (ERI) integrates climate related risk into its risk intelligence process and is a key part of our ESG oversight and management. Our ERI team works closely with our enterprise leadership team throughout the year to evaluate, manage, and plan risk management for the businesses upstream, downstream, and direct operations. We define our value chain stages through the guidance of the GHG Protocol. The Board of Directors' Sustainability, Corporate Governance, and Nominating Committee oversees the Company's sustainability efforts, including the development and implementation of policies relating to ESG issues. Members of this Committee monitor the Company's performance against its sustainability and ESG objectives, including the risks of climate change. The Technology and Innovation Committee within the Board of Directors also considers climate risk as they propose strategies for innovative solutions to address climate change, GHG emissions, and the need for products built with circularity and energy efficiency in the forefront. Our strategy to identify, assess, and manage climate risk takes place within our ESG management and oversight process.*

[Add row]

## (2.2.7) Are the interconnections between environmental dependencies, impacts, risks and/or opportunities assessed?

### (2.2.7.1) Interconnections between environmental dependencies, impacts, risks and/or opportunities assessed

Select from:

Yes

### (2.2.7.2) Description of how interconnections are assessed

*In 2022, Trane Technologies performed a quantitative and qualitative climate scenario analysis to identify and manage emerging and existing climate-related risks and opportunities to the business. Scenario analysis is used to enhance the resiliency of the organization through assessment of potential futures surrounding policy developments and market shifts, physical impacts, as well as interpreting the implications and impacts under different future scenarios. The climate scenario analysis for transition risks and opportunities included direct consolidated operations and excluded upstream and downstream suppliers, organizations, customers, and other operations not within direct consolidated control of Trane Technologies. The physical climate risk assessment included 45 priority locations around the world and their insured asset values, which included several facility types such as manufacturing, office, and research and development. Our Enterprise Risk Intelligence Committee integrates climate-related risks and opportunities into the risk management process and is a key part of ESG oversight and management. The Enterprise Risk*

*Intelligence Committee works closely with the Enterprise Leadership Team throughout the year to evaluate, manage, and plan climate risk management for the businesses' upstream, downstream, and direct operations.*

*[Fixed row]*

## **(2.3) Have you identified priority locations across your value chain?**

### **(2.3.1) Identification of priority locations**

*Select from:*

Yes, we are currently in the process of identifying priority locations

### **(2.3.2) Value chain stages where priority locations have been identified**

*Select all that apply*

Direct operations

Upstream value chain

### **(2.3.3) Types of priority locations identified**

Sensitive locations

Areas of limited water availability, flooding, and/or poor quality of water

Locations with substantive dependencies, impacts, risks, and/or opportunities

Locations with substantive dependencies, impacts, risks, and/or opportunities relating to water

### **(2.3.4) Description of process to identify priority locations**

*We have identified priority locations through climate scenario planning as well as through a nature LEAP assessment.*

### **(2.3.5) Will you be disclosing a list/spatial map of priority locations?**

*Select from:*

No, we have a list/geospatial map of priority locations, but we will not be disclosing it

[Fixed row]

## (2.4) How does your organization define substantive effects on your organization?

### Risks

#### (2.4.1) Type of definition

Select all that apply

Qualitative

Quantitative

#### (2.4.2) Indicator used to define substantive effect

Select from:

Other, please specify :Impact to enterprise earnings and/or cashflow

#### (2.4.3) Change to indicator

Select from:

Absolute decrease

#### (2.4.5) Absolute increase/ decrease figure

25000000

#### (2.4.6) Metrics considered in definition

Select all that apply

Frequency of effect occurring

Time horizon over which the effect occurs

Likelihood of effect occurring

## (2.4.7) Application of definition

*Our Enterprise Risk Assessment process seeks to understand and evaluate risks by considering impact, likelihood and vulnerability of financial, operational and regulatory/reputational risks. High-A high financial impact represents a financial impact in excess of \$25M in enterprise earnings and/or cash flow. A high operational impact is one that may have a significant impact on operational capacity or critical, complex processes/systems. High regulatory/ reputational impacts may result in significant negative reputational impact. Medium-Medium financial impacts represent potential enterprise earning and/or cash flow impacts between \$5M and \$25M. From an operational perspective, they may have moderate impact on capacity and could affect processes and systems that are non-critical. Medium regulatory/reputational impacts have moderate impacts on enterprise reputation. Low-Low financial impacts pose risks up to but not exceeding \$5M in enterprise earnings and/or cash flow. From an operational perspective, low impacts have minimal impact on capacity, processes and/or systems. Low regulatory/ reputational impacts have low impact on enterprise reputation. Consideration is also given to the likelihood of occurrence (more than once per year, once in five years or once in 25 years) and the potential exposure to the enterprise after management actions are considered (measure of residual risk).*

## Opportunities

### (2.4.1) Type of definition

*Select all that apply*

Qualitative

Quantitative

*[Add row]*

**(2.5) Does your organization identify and classify potential water pollutants associated with its activities that could have a detrimental impact on water ecosystems or human health?**

### (2.5.1) Identification and classification of potential water pollutants

*Select from:*

Yes, we identify and classify our potential water pollutants

### (2.5.2) How potential water pollutants are identified and classified

*Water pollutants of concern are identified as part of our wastewater discharge permitting process that is completed with local water authorities. We adopt and integrate pre-treatment and work practices to ensure our discharged effluent is compliant with the standards adopted for the parameters of concern.*

[Fixed row]

## **(2.5.1) Describe how your organization minimizes the adverse impacts of potential water pollutants on water ecosystems or human health associated with your activities.**

### **Row 1**

#### **(2.5.1.1) Water pollutant category**

Select from:

Nitrates

#### **(2.5.1.2) Description of water pollutant and potential impacts**

*Our factories with permitted wastewater pre-treatment systems have in some cases discharge limits assigned for nitrogen/nitrate species. Our monitoring indicates discharges are very low or below detectable levels for nitrogen related species. The pre-treatment systems discharge to the community wastewater treatment system for final treatment. Trane Technologies does not discharge pre-treated wastewater directly to receiving water bodies. The potential for environmental impact for discharged nitrates is very low.*

#### **(2.5.1.3) Value chain stage**

Select all that apply

Direct operations

#### **(2.5.1.4) Actions and procedures to minimize adverse impacts**

Select all that apply

Assessment of critical infrastructure and storage condition (leakages, spillages, pipe erosion etc.) and their resilience

Beyond compliance with regulatory requirements

Industrial and chemical accidents prevention, preparedness, and response

#### **(2.5.1.5) Please explain**

*Our operations are not a source of nitrogen related water contaminates.*

## Row 2

### (2.5.1.1) Water pollutant category

Select from:

- Inorganic pollutants

### (2.5.1.2) Description of water pollutant and potential impacts

*Our manufacturing facilities with tertiary wastewater pre-treatment systems are permitted with the local water authorities for discharges of low concentrations of inorganic metals. The pre-treatment systems remove most of the metals from the process influent. The treated water/effluent is discharged to the community wastewater treatment system for final treatment. Trane Technologies does not discharge pre-treated wastewater directly to receiving water bodies. The potential for environmental impact for discharged inorganic materials is very low.*

### (2.5.1.3) Value chain stage

Select all that apply

- Direct operations

### (2.5.1.4) Actions and procedures to minimize adverse impacts

Select all that apply

- Beyond compliance with regulatory requirements
- Industrial and chemical accidents prevention, preparedness, and response

### (2.5.1.5) Please explain

*Trane Technologies operates all pre-treatment equipment above and beyond the regulatory standards. We utilize an internal discharge limit of 50% of the regulatory limit to ensure that we minimize the concentration of all regulated materials. We have further moved to utilizing of batch treatment equipment for most locations that allows us to confirm every batch of treated water is within the internal/50% lower discharge limit.*

## Row 3

### (2.5.1.1) Water pollutant category

Select from:

- Phosphates

### (2.5.1.2) Description of water pollutant and potential impacts

*In some cases, Trane Technologies completes zinc phosphatizing to prepare water parts for painting. These locations all utilize tertiary pre-treatment systems that are permitted with the local water authorities for discharges of low concentrations of phosphates/phosphorous species. The pre-treatment systems remove most of the phosphates from the process influent. The treated water/effluent is discharged to the community wastewater treatment system for final treatment. Trane Technologies does not discharge pre-treated wastewater directly to receiving water bodies. The potential for environmental impact for discharged phosphorous related materials is very low.*

### (2.5.1.3) Value chain stage

Select all that apply

- Direct operations

### (2.5.1.4) Actions and procedures to minimize adverse impacts

Select all that apply

- Assessment of critical infrastructure and storage condition (leakages, spillages, pipe erosion etc.) and their resilience
- Beyond compliance with regulatory requirements
- Industrial and chemical accidents prevention, preparedness, and response

### (2.5.1.5) Please explain

*Trane Technologies operates all pre-treatment equipment above and beyond the regulatory requirements. We utilize an internal discharge limit of 50% of the regulatory limit to ensure that we minimize the concentration of all regulated materials. We have further moved to utilizing of batch treatment equipment for most locations that allows us to confirm every batch of treated water is within the internal/50% lower discharge limit.*

## Row 4

### (2.5.1.1) Water pollutant category

Select from:

- Oil

### (2.5.1.2) Description of water pollutant and potential impacts

*Our manufacturing facilities that generate process wastewater have the potential to discharge oily materials. We utilize both permitted and voluntary pre-treatment systems to remove oil before effluent is released to the community wastewater treatment system for final treatment. Trane Technologies does not discharge pre-treated wastewater directly to receiving water bodies. The potential for environmental impact from discharged oily materials is expected to be very low.*

### (2.5.1.3) Value chain stage

*Select all that apply*

- Direct operations

### (2.5.1.4) Actions and procedures to minimize adverse impacts

*Select all that apply*

- Assessment of critical infrastructure and storage condition (leakages, spillages, pipe erosion etc.) and their resilience
- Resource recovery
- Beyond compliance with regulatory requirements
- Industrial and chemical accidents prevention, preparedness, and response

### (2.5.1.5) Please explain

*Trane Technologies operates all pre-treatment equipment above and beyond the regulatory standards. We utilize an internal discharge limit of 50% of the regulatory limit to ensure that we minimize the concentration of all regulated materials. We have further moved to utilizing batch treatment equipment for most locations that allows us to confirm that every batch of treated water is within the internal/50% lower discharge limit. Our locations also utilize oil spill and prevention measures (e.g., containment, good housekeeping, emergency response, etc.) to avoid oily materials impacting water.*

*[Add row]*

### C3. Disclosure of risks and opportunities

**(3.1) Have you identified any environmental risks which have had a substantive effect on your organization in the reporting year, or are anticipated to have a substantive effect on your organization in the future?**

#### Climate change

##### (3.1.1) Environmental risks identified

Select from:

Yes, both in direct operations and upstream/downstream value chain

#### Water

##### (3.1.1) Environmental risks identified

Select from:

No

##### (3.1.2) Primary reason why your organization does not consider itself to have environmental risks in your direct operations and/or upstream/downstream value chain

Select from:

Environmental risks exist, but none with the potential to have a substantive effect on our organization

##### (3.1.3) Please explain

*Based on our materiality and Nature LEAP assessments, water risk has not been identified as a highly material topic.*

#### Plastics

##### (3.1.1) Environmental risks identified

Select from:

No

### (3.1.2) Primary reason why your organization does not consider itself to have environmental risks in your direct operations and/or upstream/downstream value chain

Select from:

Not an immediate strategic priority

### (3.1.3) Please explain

*We have not begun assessing risks related to plastics for our organization.*

*[Fixed row]*

**(3.1.1) Provide details of the environmental risks identified which have had a substantive effect on your organization in the reporting year, or are anticipated to have a substantive effect on your organization in the future.**

## Climate change

### (3.1.1.1) Risk identifier

Select from:

Risk1

### (3.1.1.3) Risk types and primary environmental risk driver

Technology

Other technology risk, please specify :Substitution of existing products and services with lower emissions options

### (3.1.1.4) Value chain stage where the risk occurs

Select from:

- Direct operations

### (3.1.1.6) Country/area where the risk occurs

Select all that apply

- United States of America

### (3.1.1.9) Organization-specific description of risk

*In the case of aggressive climate action SSP1-1.9 (1.5°C) or IEA APS, there could be high negative impact on sales of HVAC and transport solutions. Assuming Trane Technologies' share in the sector remaining constant, the enterprise valuation is expected to be roughly 13% lower as compared to the business-as-usual scenario. There may be significant requirement to rework manufacturing and product value offering due to rapid changes in demand in technology leading to a high impact on operating costs and R&D expenditures. Trane Technologies may see major investment requirements and costs associated with continual innovation to meet changing demands and policies for products. Trane Technologies may see significant change in the mix of priority products and markets due to changing demands for technology in efficient operation and energy use. Revenues are estimated to shrink by about 7% against the 2021 baseline due to changes in demand. Based on the climate scenario analysis conducted in 2022, Trane Technologies believes we are well prepared to seize opportunities arising from climate change. Our business strategy is aligned to sustainability megatrends and we stay abreast of emerging policy and regulations. We continually invest in innovation to develop industry-leading, sustainable solutions, and could see significant demand from customers for these products and services.*

### (3.1.1.11) Primary financial effect of the risk

Select from:

- Decreased revenues due to reduced demand for products and services

### (3.1.1.12) Time horizon over which the risk is anticipated to have a substantive effect on the organization

Select all that apply

- Medium-term

### (3.1.1.13) Likelihood of the risk having an effect within the anticipated time horizon

Select from:

- Unlikely

### (3.1.1.14) Magnitude

Select from:

Medium-low

### (3.1.1.16) Anticipated effect of the risk on the financial position, financial performance and cash flows of the organization in the selected future time horizons

*In the medium-term time horizon, there may be significant requirement to rework manufacturing and product value offering due to rapid changes in demand in technology leading to a high impact on operating costs and R&D expenditures. Trane Technologies may see major investment requirements and costs associated with continual innovation to meet changing demands and policies for products. Trane Technologies may see significant change in the mix of priority products and markets due to changing demands for technology in efficient operation and energy use. Revenues could potentially shrink by about 7% against the 2021 baseline due to changes in demand. Based on the climate scenario analysis conducted in 2022, Trane Technologies believes we are well prepared to seize opportunities arising from climate change. Our business strategy is aligned to sustainability megatrends and we stay abreast of emerging policy and regulations. We continually invest in innovation to develop industry-leading, sustainable solutions, and could see significant demand from customers for these products and services.*

### (3.1.1.17) Are you able to quantify the financial effect of the risk?

Select from:

Yes

### (3.1.1.21) Anticipated financial effect figure in the medium-term – minimum (currency)

989800000

### (3.1.1.22) Anticipated financial effect figure in the medium-term – maximum (currency)

989800000

### (3.1.1.25) Explanation of financial effect figure

*The above is an estimate based on: Based on aggressive climate scenario, revenues could potentially shrink 7% against our 2021 baseline. In 2021, revenues were 14.14B. 7% x 14.14B 989,800,000*

### (3.1.1.26) Primary response to risk

Infrastructure, technology and spending

Increase investment in R&D

### (3.1.1.27) Cost of response to risk

310000000

### (3.1.1.28) Explanation of cost calculation

In 2024, we spent \$310 million in sustainability-driven R&D.

### (3.1.1.29) Description of response

Trane Technologies has taken various measures to reduce its risk for technology obsolescence, through R&D investment in energy efficient products, developing products that allow for use of lower GWP refrigerants, substitute materials and fuels, and other innovation research to prepare for shifting trends in technology. Trane Technologies is also using R&D to develop electrification solutions for comfort and process heating and refrigerated transport. In 2024, we spent \$310M in sustainability-driven R&D focused on innovation.

## Climate change

### (3.1.1.1) Risk identifier

Select from:

Risk2

### (3.1.1.3) Risk types and primary environmental risk driver

Acute physical

Flooding (coastal, fluvial, pluvial, groundwater)

### (3.1.1.4) Value chain stage where the risk occurs

Select from:

Direct operations

### (3.1.1.6) Country/area where the risk occurs

Select all that apply

- United States of America

### (3.1.1.9) Organization-specific description of risk

*The analysis determined that Trane Technologies' direct operations are projected to experience impact as it relates to both acute physical risks and chronic physical risks from climate change under the insufficient climate action scenario, moderate climate action scenario, and aggressive climate action scenario. Trane Technologies locations are exposed to multiple physical hazards, with locations in China, the United States including Puerto Rico, India and Thailand exposed to the most severe physical risks. Across priority physical hazards, the greatest physical risk exposure across Trane Technologies' locations is to extreme heat, extreme cold, and extreme precipitation. Sea level rise may result in high rates of coastal flooding at certain facilities. Undertaking physical scenario analysis for Trane Technologies' priority facilities selected helps to indicate the degree of potential flooding which could lead to increase in operating costs and capital costs due to damages. The occurrence of one or more unexpected events including hurricanes, floods and other forms of severe weather could adversely affect our operations and financial performance. This could result in physical damage to and complete or partial closure of one or more of our plants, temporary or long-term disruption of our operations by causing business interruptions or by impacting the availability and cost of materials needed for manufacturing.*

### (3.1.1.11) Primary financial effect of the risk

Select from:

- Disruption in production capacity

### (3.1.1.12) Time horizon over which the risk is anticipated to have a substantive effect on the organization

Select all that apply

- Medium-term

### (3.1.1.13) Likelihood of the risk having an effect within the anticipated time horizon

Select from:

- Likely

### (3.1.1.14) Magnitude

Select from:

- Medium

### (3.1.1.16) Anticipated effect of the risk on the financial position, financial performance and cash flows of the organization in the selected future time horizons

*In the medium-term time horizon, Trane Technologies locations may be exposed to multiple physical hazards, with locations in China, the United States, India and Thailand exposed to the most severe physical risks. Across priority physical hazards, the greatest physical risk exposure across Trane Technologies' locations is to extreme heat, extreme cold, and extreme precipitation. Sea level rise may result in high rates of coastal flooding at certain facilities. Undertaking physical scenario analysis for Trane Technologies' priority facilities selected helps to indicate the degree of potential flooding which could lead to increase in operating costs and capital costs due to damages. The occurrence of one or more unexpected events including hurricanes, floods and other forms of severe weather could adversely affect our operations and financial performance. This could result in physical damage to and complete or partial closure of one or more of our plants, temporary or long-term disruption of our operations by causing business interruptions or by impacting the availability and cost of materials needed for manufacturing.*

### (3.1.1.17) Are you able to quantify the financial effect of the risk?

Select from:

Yes

### (3.1.1.21) Anticipated financial effect figure in the medium-term – minimum (currency)

81900000

### (3.1.1.22) Anticipated financial effect figure in the medium-term – maximum (currency)

81900000

### (3.1.1.25) Explanation of financial effect figure

*Under the assumption of a medium time horizon for acute physical risks, each site is assigned an exposure rating from very low to very high. For sites that are considered very high risk for flooding, we have identified the 2021 Cost of Goods Sold (COGS) as: 81.9M. We estimate that this could be the potential impact if site with high flood risk were unable to operate.*

### (3.1.1.26) Primary response to risk

Compliance, monitoring and targets

Implementation of environmental best practices in direct operations

### (3.1.1.27) Cost of response to risk

0

### (3.1.1.28) Explanation of cost calculation

*There is no cost to respond to this risk as it is rolled into our water management process.*

### (3.1.1.29) Description of response

*Planning for an extreme weather event, and other crises, is managed as a risk in our Enterprise Risk Intelligence process and is consistent with our core corporate values. For example: The Trane Technologies Crisis Management Resource Guide and our Facility Crisis Management Plans, have been developed to help manage a crisis successfully at the local level by minimizing impact through a structured, timely and practiced response. Relative to water stress: Annually, we conduct a risk assessment using the World Resources Institute (WRI) Aqueduct (TM) tool and designate sites that score medium-high or high for water stress. We consider physical risk quality and quantity, as well as regulatory and reputational risk. In 2024, 17 sites globally were considered to be in areas at risk. For these sites we have a 2030 target in place to reduce water consumption and to be net water positive. We have enterprise water management policies for water supply management, storm water management and wastewater discharge management. There is no cost of response to this risk as it is rolled into our water management process.*

## Climate change

### (3.1.1.1) Risk identifier

Risk3

### (3.1.1.3) Risk types and primary environmental risk driver

Policy

Carbon pricing mechanisms

### (3.1.1.4) Value chain stage where the risk occurs

Select from:

Direct operations

### (3.1.1.6) Country/area where the risk occurs

Select all that apply

United States of America

### (3.1.1.9) Organization-specific description of risk

*The impact of climate change due to exposure to emerging GHG emissions regulations and taxation considering short term time horizons i.e. for the period 1-3 years is detailed below: Under the assumption of aggressive climate action SSP1-1.9 (1.5°C) or IEA APS, there may be heightened costs associated with compliance with regulations and policies. If the carbon intensity of business stays constant, Trane Technologies may directionally incur carbon costs in Asia, the Americas and EMEA under SSP1-1.9 and under low energy demand. If Trane Technologies stays on a Net Zero by 2050 trajectory, carbon costs may be significantly reduced but still present. Trane Technologies may see significant increase in operating costs associated with meeting GHG emissions regulations in several areas (i.e. energy efficiency, building codification and requirements, materials regulation, refrigerants, carbon costs, emissions restrictions, net zero targets). Trane Technologies may see reduction in demand for products dependent on fossil fuels and other high GWP materials. Based on the climate scenario analysis conducted in 2022, Trane Technologies believes we are well prepared to seize opportunities arising from climate change. Our business strategy is aligned to sustainability megatrends and we stay abreast of emerging policy and regulations. We continually invest in innovation to develop industry-leading, sustainable solutions, and could see significant demand for these products and services*

### (3.1.1.11) Primary financial effect of the risk

### (3.1.1.13) Likelihood of the risk having an effect within the anticipated time horizon

Select from:

Unlikely

### (3.1.1.14) Magnitude

Select from:

Medium-low

### **(3.1.1.16) Anticipated effect of the risk on the financial position, financial performance and cash flows of the organization in the selected future time horizons**

*The impact of climate change due to exposure to emerging GHG emissions regulations and taxation considering short term time horizons i.e. for the period 1-3 years is detailed below: if the carbon intensity of business stays constant, Trane Technologies may directionally incur carbon costs in Asia, the Americas and EMEA under SSP1-1.9 and under low energy demand. If Trane Technologies stays on a Net Zero by 2050 trajectory, carbon costs may be significantly reduced but still present. Trane Technologies may see significant increase in operating costs associated with meeting GHG emissions regulations in several areas (i.e. energy efficiency, building codification and requirements, materials regulation, refrigerants, carbon costs, emissions restrictions, net zero targets). Trane Technologies may see reduction in demand for products dependent on fossil fuels and other high GWP materials. Based on the climate scenario analysis conducted in 2022, Trane Technologies believes we are well prepared to seize opportunities arising from climate change. Our business strategy is aligned to sustainability megatrends and we stay abreast of emerging policy and regulations. We continually invest in innovation to develop industry-leading, sustainable solutions, and could see significant demand for these products and services*

### **(3.1.1.17) Are you able to quantify the financial effect of the risk?**

Select from:

Yes

### **(3.1.1.19) Anticipated financial effect figure in the short-term – minimum (currency)**

265000000

### **(3.1.1.20) Anticipated financial effect figure in the short-term – maximum (currency)**

265000000

### **(3.1.1.25) Explanation of financial effect figure**

*Under the assumption of aggressive climate action SSP1- 1.9 (1.5°C) or IEA APS, if carbon intensity of the business stays constant, we estimate that Trane Technologies may potentially incur carbon costs of up to 265M.*

### **(3.1.1.26) Primary response to risk**

## Engagement

- Align organization's public policy engagement with its environmental strategy

### (3.1.1.27) Cost of response to risk

0

### (3.1.1.28) Explanation of cost calculation

*This risk response is built into our advocacy strategy. We have a robust advocacy strategy that addresses the risk that global climate change may negatively affect Trane Technologies' operations due to changes in legislative and regulatory requirements or potential defunding of climate-related international agreements or initiatives. We have a commitment to reduce absolute energy consumption by 10% by 2030, commitment to be 100% renewable energy powered by 2040, as well as a SBTi approved net-zero commitment by 2050.*

### (3.1.1.29) Description of response

*The projected outcomes in each of the foregoing scenarios is based only on the limited assumptions that have been provided and actual results under any or all of the scenarios could materially differ due to factors outside of the scope of these assumptions, or if the assumptions differ. This information should not be relied upon as a statement of, or revision to, any forward-looking guidance provided by the Company in conjunction with its SEC filings.*

*[Add row]*

## **(3.1.2) Provide the amount and proportion of your financial metrics from the reporting year that are vulnerable to the substantive effects of environmental risks.**

### **Climate change**

#### **(3.1.2.1) Financial metric**

Select from:

- OPEX

#### **(3.1.2.2) Amount of financial metric vulnerable to transition risks for this environmental issue (unit currency as selected in 1.2)**

**(3.1.2.3) % of total financial metric vulnerable to transition risks for this environmental issue**

Select from:

- Less than 1%

**(3.1.2.4) Amount of financial metric vulnerable to physical risks for this environmental issue (unit currency as selected in 1.2)**

0

**(3.1.2.5) % of total financial metric vulnerable to physical risks for this environmental issue**

Select from:

- Less than 1%

**(3.1.2.7) Explanation of financial figures**

*The cost associated with development of energy efficient technologies and management of policy advocacy are accounted for in our sustainability-driven R&D. Our R&D spend in 2024 was USD 310M, therefore we believe this is what is vulnerable to the effects of transition risk within the reporting year.  
[Add row]*

**(3.3) In the reporting year, was your organization subject to any fines, enforcement orders, and/or other penalties for water-related regulatory violations?**

	Water-related regulatory violations	Comment
	Select from:	No fines, penalties, or enforcement orders occurred calendar year 2024.

	Water-related regulatory violations	Comment
	<input checked="" type="checkbox"/> No	

[Fixed row]

**(3.5) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?**

Select from:

No, and we do not anticipate being regulated in the next three years

**(3.6) Have you identified any environmental opportunities which have had a substantive effect on your organization in the reporting year, or are anticipated to have a substantive effect on your organization in the future?**

**Climate change**

**(3.6.1) Environmental opportunities identified**

Select from:

Yes, we have identified opportunities, and some/all are being realized

**Water**

**(3.6.1) Environmental opportunities identified**

Select from:

No

**(3.6.2) Primary reason why your organization does not consider itself to have environmental opportunities**

Select from:

- Opportunities exist, but none anticipated to have a substantive effect on organization

### (3.6.3) Please explain

*Based on our nature assessment, no material opportunities exist related to water.*

*[Fixed row]*

**(3.6.1) Provide details of the environmental opportunities identified which have had a substantive effect on your organization in the reporting year, or are anticipated to have a substantive effect on your organization in the future.**

### Climate change

#### (3.6.1.1) Opportunity identifier

*Select from:*

Products and services

- Increased sales of existing products and services

#### (3.6.1.4) Value chain stage where the opportunity occurs

*Select from:*

- Downstream value chain

#### (3.6.1.5) Country/area where the opportunity occurs

*Select all that apply*

- United States of America

#### (3.6.1.8) Organization specific description

*Under the assumption of aggressive climate action SSP1-1.9 (1.5°C) there may be potential for high growth through aggressive new product development. The enterprise valuation of a company the size of Trane Technologies could shrink by approximately 27% under a low energy demand scenario thereby indicating a potential 27% market in new products that may be captured by Trane Technologies through development of low energy and low carbon emission products. Trane Technologies could see significant demand from customers for energy efficient products to meet regulatory requirements and policies. There may be an increase in revenue available to capture from aligning with requirements such as building codes for efficiency, emissions output of products, material sourcing, and other technological advancements. Utilizing these assumptions, we could envision an approximately 32% growth in revenue may be captured by investing in alternative technologies. Based on the climate scenario analysis conducted in 2022, Trane Technologies believes we are well prepared to seize opportunities arising from climate change. Our business strategy is aligned to sustainability megatrends and we stay abreast of emerging policy and regulations. We continually invest in innovation to develop industry-leading, sustainable solutions, and could see significant demand from customers for these products and services.*

### **(3.6.1.9) Primary financial effect of the opportunity**

Select from:

- Increased revenues resulting from increased demand for products and services

### **(3.6.1.10) Time horizon over which the opportunity is anticipated to have a substantive effect on the organization**

Select all that apply

- Medium-term

### **(3.6.1.11) Likelihood of the opportunity having an effect within the anticipated time horizon**

Select from:

- Likely (66–100%)

### **(3.6.1.12) Magnitude**

Select from:

- Medium-high

### **(3.6.1.14) Anticipated effect of the opportunity on the financial position, financial performance and cash flows of the organization in the selected future time horizons**

*Increased revenues due to increased demand of products.*

### **(3.6.1.15) Are you able to quantify the financial effects of the opportunity?**

Select from:

Yes

### (3.6.1.19) Anticipated financial effect figure in the medium-term - minimum (currency)

9127000000

### (3.6.1.20) Anticipated financial effect figure in the medium-term - maximum (currency)

9127000000

### (3.6.1.23) Explanation of financial effect figures

*The above is an estimate based on: More than 90 percent of our product portfolio directly addresses demands for greater energy efficiency with lower greenhouse gas (GHG) emissions in buildings, homes and transport markets around the world. We reported net revenues of 19.84B in 2024, with 46% of that calculated as sustainable revenue as defined by Corporate Knights' Sustainable Economy Taxonomy for Green Products. We expect demand for our sustainable products and services will increase with effective product efficiency regulation. We estimate that 46 percent of our 2024 revenue is the gross potential financial impact.  $46\% \times 19.84B = 9.127B$ .*

### (3.6.1.24) Cost to realize opportunity

310000000

### (3.6.1.25) Explanation of cost calculation

*The cost associated with development of energy efficient technologies and management of policy advocacy are accounted for in our sustainability-driven R&D. Our R&D spend in 2024 was 310m USD, therefore that is the cost to realize this opportunity.*

### (3.6.1.26) Strategy to realize opportunity

*Product development and innovation: Our portfolio most directly affects the environment during the in-use phase of the product's life cycle, so designing for energy efficient operation is paramount. Trane Technologies supports cost effective policies that facilitate market transition to more energy efficient technologies. We actively advocate for legislative efforts to facilitate the increased use of energy efficiency technologies in the residential and commercial sectors while fostering job creation. We define our customer carbon footprint as those emissions we are able to avoid through the use of our products when compared to a business as usual scenario. Increased demand for system-level building efficiency in the face of climate change has provided Trane Technologies an opportunity to lead by example through supporting customers decarbonization efforts. For example, in 2022, Trane launched CITY Advantage, a line of compact scroll water-cooled chillers and water-source heat pumps for commercial use. These new products use R454B, a low-GWP refrigerant that offers a 76% reduction in direct GWP against R410A and a 34%*

reduction against R32. The CITY Advantage line also helps customers move away from fossil fuel-based technologies and achieve an 11% better Seasonal Energy Efficiency Ratio (SEER) in cooling mode and up to 5% better Seasonal Coefficient of Performance (SCOP) in pure heating mode. These modular technologies help our small to medium business customers reduce their emissions footprint, increase efficiency, and lower operating costs.

## Climate change

Select from:

Downstream value chain

### (3.6.1.5) Country/area where the opportunity occurs

Select all that apply

United States of America

### (3.6.1.8) Organization specific description

*Changes in weather patterns and seasonal fluctuations affect certain segments of our business. Demand for certain segments of our products and services is influenced by weather conditions. For instance, Trane's sales of Heating, Ventilating and Air Conditioning equipment have historically tended to be seasonally higher in the second and third quarters of the year because, in the U.S. and other northern hemisphere markets, summer is the peak season for sales of air conditioning systems and services. Therefore, unseasonably warm trends during the summer season could positively affect certain segments of our business and impact overall results of operations.*

### (3.6.1.9) Primary financial effect of the opportunity

Select from:

Increased revenues resulting from increased demand for products and services

### **(3.6.1.10) Time horizon over which the opportunity is anticipated to have a substantive effect on the organization**

Select all that apply

Short-term

### **(3.6.1.11) Likelihood of the opportunity having an effect within the anticipated time horizon**

Select from:

Very likely (90–100%)

### **(3.6.1.12) Magnitude**

Select from:

Medium-high

### **(3.6.1.14) Anticipated effect of the opportunity on the financial position, financial performance and cash flows of the organization in the selected future time horizons**

*Increased revenues due to increased demand of products.*

### **(3.6.1.15) Are you able to quantify the financial effects of the opportunity?**

Select from:

Yes

### **(3.6.1.17) Anticipated financial effect figure in the short-term - minimum (currency)**

9127000000

### **(3.6.1.18) Anticipated financial effect figure in the short-term – maximum (currency)**

9127000000

### (3.6.1.23) Explanation of financial effect figures

The above is an estimate based on: Total Revenues (which includes Trane and American Standard Heating and Air Conditioning; energy services and building automation and Thermo King transport temperature control solutions) were 19.84B USD in 2024. We have calculated our Sustainable Revenue based on the Corporate Knights definition and methodology to be 46% of our total revenue. 46% of 19.84B is 9.127B

### (3.6.1.24) Cost to realize opportunity

310000000

### (3.6.1.25) Explanation of cost calculation

The cost associated with development of energy efficient technologies and management of policy advocacy are accounted for in our sustainability-driven R&D. Our R&D spend in 2024 was 310m USD, therefore that is the cost to realize this opportunity.

### (3.6.1.26) Strategy to realize opportunity

*Innovation and Growth: Our growth strategy is guided by the Trane Technologies business operating system, which is foundational to what we do and how we run the company. Our business operating system extends from strategy development, to how we connect with our customers and help make them successful to how Trane Technologies is paid for the customer value we create. Leveraging our business operating system, we use customer analytics tools to gain greater insight into our customers and competitors to make strategic choices about the most promising and profitable growth opportunities. Our Product Growth Teams (PGT) bring together leaders in product management, global integrated supply chain (GISC) and engineering to evaluate the entire value stream. Costs associated with development of energy efficient technologies are primarily in R&D. Our R&D spend in 2024 was 310M USD.*

#### (3.6.1.8) Organization specific description

*A little less than half of the world's population today lives in an urban environment, but trends suggest that an additional 350 million people will be added to the urban population over the next 15 years. This means that significant additions to urban capacity, in the form of housing, infrastructure and facilities, will be required to help cities keep up with a rapid influx of people. Driving innovation for developing markets is an issue of significant importance to our stakeholders and Trane Technologies. We are working strategically to increase our exposure to emerging markets. We are also strategically committed to addressing social and environmental imperatives to assist in expanding energy and other resource efficiency knowledge in developing regions. As a company that provides solutions for energy efficiency, economic productivity and greenhouse gas mitigation - through brands such as Trane and American Standard that provide heating, ventilation and air conditioning systems for commercial and residential buildings; and Thermo King, a leading provider of transport temperature control solutions, we are positioned to help meet these challenges. The expected population shift can lead to an increased demand for these products and solutions.*

6349000000

### (3.6.1.23) Explanation of financial effect figures

*The above is an estimate based on: We expect the global socio-economic trend of increased urbanization will result in accelerated growth in developing markets. In 2024, our average revenue from innovation was 32% This 32% is Trane Technologies' Innovation Revenue metric. We define the metric as the revenue occurring in the current reporting year, derived from new solutions or new markets launched within the prior 36 months.  $32\% \times 19.84B$  (2024 revenue) = 6.349B*

### (3.6.1.24) Cost to realize opportunity

310000000

### (3.6.1.25) Explanation of cost calculation

The cost associated with development of energy efficient technologies and management of policy advocacy are accounted for in our sustainability-driven R&D. Our R&D spend in 2024 was 310m USD, therefore that is the cost to realize this opportunity

### (3.6.1.26) Strategy to realize opportunity

To accelerate growth in emerging markets we are focusing on innovation to serve these markets. We use a three-step process to prioritize our investments in these markets. 1) we consider the macroeconomic and geopolitical conditions of an emerging market at the country level 2) we perform an analytical assessment of the current attractiveness of our business, considering competitors, customers and channels 3) we consider how the attractiveness of this business will evolve. We employ thousands of engineers at 14 engineering and technology centers globally, including facilities in India, Prague, Czech Republic and Shanghai, China. Our innovation effort have been particularly successful in China which makes up a majority of emerging market revenue. We have established large local teams with manufacturing facilities and strong local channel partners. For example: The Trane HVAC business in China is participating in the 'Coal to Electricity' program which is intended to significantly lower coal consumption for winter heating in North China, prevent air pollution and improve the air quality in China over the long term.

- Quarterly

#### (4.3.1.6) Please explain

*(i) The Chair and CEO is the highest management-level position with responsibility for climate-related issues. Performance against our 2030 Sustainability Commitments and corporate strategy is reviewed in every Board meeting (6 times per year) as part of our strategy development and reporting of progress. (ii) Trane Technologies' Sustainability Office is managed by the Chief Technology and Sustainability Officer, a direct report to the Chair and CEO (iii) The Sustainability Office works with business leadership teams to accelerate sustainable innovation and technology-led growth strategies and promote an innovation-centric mindset for the organization.*

## Water

#### (4.3.1.1) Position of individual or committee with responsibility

Executive level

- Chief Executive Officer (CEO)

#### (4.3.1.2) Environmental responsibilities of this position

Policies, commitments, and targets

- Monitoring compliance with corporate environmental policies and/or commitments
- Measuring progress towards environmental corporate targets
- Setting corporate environmental targets

#### (4.3.1.4) Reporting line

Select from:

- Reports to the board directly

#### (4.3.1.5) Frequency of reporting to the board on environmental issues

Select from:

- As important matters arise

#### (4.3.1.6) Please explain

*The Board of Directors approved Trane Technologies' sustainability commitments, monitors progress, and has overall responsibility for ensuring the commitments are met. We have a 2030 net positive water commitment against a 2019 baseline which includes annual targets. Progress on sustainability commitments is publicly reported at least annually in the Sustainability Report. In 2020, the Board of Directors approved a 2030 net positive water commitment and monitors progress towards that goal. Sustainability, including water reduction commitments, are overseen by our Sustainability, Corporate Governance and Nominating Committee of the Board (the "Committee") and the Enterprise Leadership Team. The Committee, on behalf of the Board, sets the strategic direction for Trane Technologies' sustainability approach. The Committee meets at least annually to evaluate the company's sustainability performance and is informed regularly by the company's SVP and Chief Technology and Sustainability Officer (CTO). The CTO has the role of providing these and other updates to this Committee on a regular basis.*

[Add row]

### **(4.5) Do you provide monetary incentives for the management of environmental issues, including the attainment of targets?**

#### **Climate change**

#### **(4.5.1) Provision of monetary incentives related to this environmental issue**

Select from:

Yes

#### (4.5.2) % of total C-suite and board-level monetary incentives linked to the management of this environmental issue

20

#### (4.5.3) Please explain

*To more closely align the annual short-term incentive compensation of our leaders to the value that we, as a Company, place on environmental sustainability and employee diversity and inclusion, we utilize a sustainability modifier as a component of Trane Technologies' annual incentive program (AIM). This strategic modifier may adjust AIM payout amounts upward or downward by up to 20% based on progress towards our 2030 Sustainability Commitments. These objectives are considered in conjunction with the HRCC's holistic review of the Company's key accomplishments and actions taken during the year.*

## Water

#### (4.5.1) Provision of monetary incentives related to this environmental issue

Select from:

No, and we do not plan to introduce them in the next two years

#### (4.5.3) Please explain

*Water is not included in our annual incentive matrix.  
[Fixed row]*

**(4.5.1) Provide further details on the monetary incentives provided for the management of environmental issues (do not include the names of individuals).**

## Climate change

#### (4.5.1.1) Position entitled to monetary incentive

Board or executive level

- Board Chair

#### (4.5.1.2) Incentives

Select all that apply

- Bonus - % of salary

#### (4.5.1.3) Performance metrics

Targets

- Progress towards environmental targets
- Achievement of environmental targets
- Reduction in absolute emissions in line with net-zero target

Emission reduction

- Reduction in absolute emissions

#### (4.5.1.4) Incentive plan the incentives are linked to

Select from:

- Short-Term Incentive Plan, or equivalent, only (e.g. contractual annual bonus)

#### (4.5.1.5) Further details of incentives

*To more closely align the annual short-term incentive compensation of our leaders to the value that we, as a Company, place on environmental sustainability and other factors, we utilize a Sustainability modifier as a component of Trane Technologies' annual incentive program (AIM). This strategic modifier may adjust AIM payout amounts upward or downward by up to 20% based on progress towards our 2030 Sustainability Commitments. These objectives are considered in conjunction with the HRCC's holistic review of the Company's key accomplishments and actions taken during the year.*

#### (4.5.1.6) How the position's incentives contribute to the achievement of your environmental commitments and/or climate transition plan

As a sustainability-driven growth company, Trane Technologies exemplifies how embedding sustainability in business strategy and culture can generate value for our customers and our shareholders. Our environmental sustainability objectives are science-based and are aligned with our 2030 commitments toward a sustainable future, making them inherent in our AIM modifier. We aim to reduce greenhouse gas emissions in our worldwide operations, transportation fleets, and product manufacturing processes, while also inspiring the transition to advanced technologies that lower emissions from product use. Additionally, we believe that our commitment to cultivating a diverse, inclusive and uplifting culture helps drive technological advancements and future innovations, propelling progress for our customers and communities. In 2024, as part of our ongoing efforts to meet our 2030 Sustainability Commitments, we successfully maintained our internal greenhouse gas emissions at consistent levels despite substantial company growth. Furthermore, our external carbon emissions, primarily associated with customer product use, were reduced by 80 million metric tons of CO2e. We also expanded opportunities for all, broadening access to career opportunities, and highlighting Trane Technologies as an employer of choice for talented, highly qualified professionals

[Add row]

#### (4.6) Does your organization have an environmental policy that addresses environmental issues?

	Does your organization have any environmental policies?
	Select from: <input checked="" type="checkbox"/> Yes

[Fixed row]

#### (4.6.1) Provide details of your environmental policies.

##### Row 1

#### (4.6.1.1) Environmental issues covered

Select all that apply

Climate change

#### (4.6.1.2) Level of coverage

Select from:

- Organization-wide

### (4.6.1.3) Value chain stages covered

*Select all that apply*

- Direct operations
- Upstream value chain
- Downstream value chain

### (4.6.1.4) Explain the coverage

*Trane Technologies has several policies which address climate change including our EHS Policy, Energy Policy, Product Compliance & Stewardship Policy, as well as Sustainable Procurement Policy.*

### (4.6.1.5) Environmental policy content

Environmental commitments

- Commitment to comply with regulations and mandatory standards
- Commitment to take environmental action beyond regulatory compliance
- Commitment to stakeholder engagement and capacity building on environmental issues

Climate-specific commitments

- Commitment to 100% renewable energy
- Commitment to net-zero emissions

### (4.6.1.6) Indicate whether your environmental policy is in line with global environmental treaties or policy goals

*Select all that apply*

- Yes, in line with the Paris Agreement

### (4.6.1.7) Public availability

*Select from:*

- Publicly available

#### (4.6.1.8) Attach the policy

*EHS-Policy-English.pdf*

### Row 2

#### (4.6.1.1) Environmental issues covered

*Select all that apply*

- Water

#### (4.6.1.2) Level of coverage

*Select from:*

- Organization-wide

#### (4.6.1.3) Value chain stages covered

*Select all that apply*

- Direct operations
- Upstream value chain

#### (4.6.1.4) Explain the coverage

*Trane Technologies has several policies which address water including our EHS Policy, Product Compliance & Stewardship Policy, as well as Sustainable Procurement Policy.*

#### (4.6.1.5) Environmental policy content

Environmental commitments

- Commitment to comply with regulations and mandatory standards
- Commitment to take environmental action beyond regulatory compliance

- Commitment to stakeholder engagement and capacity building on environmental issues

Water-specific commitments

- Commitment to reduce water consumption volumes

#### (4.6.1.6) Indicate whether your environmental policy is in line with global environmental treaties or policy goals

Select all that apply

- Yes, in line with Sustainable Development Goal 6 on Clean Water and Sanitation

#### (4.6.1.7) Public availability

Select from:

- Publicly available

#### (4.6.1.8) Attach the policy

*EHS-Policy-English.pdf*

[Add row]

### (4.10) Are you a signatory or member of any environmental collaborative frameworks or initiatives?

#### (4.10.1) Are you a signatory or member of any environmental collaborative frameworks or initiatives?

Select from:

- Yes

#### (4.10.2) Collaborative framework or initiative

Select all that apply

- RE100
- Terra Carta
- CEO Water Mandate
- Climate Action 100+
- Race to Zero Campaign
- Science-Based Targets Initiative (SBTi)

- UN Global Compact
- We Mean Business

- Task Force on Climate-related Financial Disclosures (TCFD)
- World Business Council for Sustainable Development (WBCSD)

#### **(4.10.3) Describe your organization's role within each framework or initiative**

*Trane Technologies collaborates with like-minded organizations to accelerate progress toward a sustainable future. Our public commitments and involvement in coalitions hold us accountable as we make progress on our ambitious climate and social goals. We list our Charters, Partnerships and Memberships in our 2024 Sustainability Report beginning on page 88.*

*[Fixed row]*

#### **(4.11) In the reporting year, did your organization engage in activities that could directly or indirectly influence policy, law, or regulation that may (positively or negatively) impact the environment?**

##### **(4.11.1) External engagement activities that could directly or indirectly influence policy, law, or regulation that may impact the environment**

*Select all that apply*

- Yes, we engaged directly with policy makers
- Yes, we engaged indirectly through, and/or provided financial or in-kind support to a trade association or other intermediary organization or individual whose activities could influence policy, law, or regulation

##### **(4.11.2) Indicate whether your organization has a public commitment or position statement to conduct your engagement activities in line with global environmental treaties or policy goals**

*Select from:*

- Yes, we have a public commitment or position statement in line with global environmental treaties or policy goals

##### **(4.11.3) Global environmental treaties or policy goals in line with public commitment or position statement**

*Select all that apply*

- Paris Agreement

##### **(4.11.4) Attach commitment or position statement**

#### (4.11.5) Indicate whether your organization is registered on a transparency register

Select from:

Yes

#### (4.11.6) Types of transparency register your organization is registered on

Select all that apply

Non-government register

#### (4.11.7) Disclose the transparency registers on which your organization is registered & the relevant ID numbers for your organization

*In 2024, InfluenceMap recognized Trane Technologies as a Corporate Climate Policy Engagement Leader for science-aligned climate policy influence. Trane Technologies was recognized as being in the top 4th globally among companies evaluated for positive and active climate policy engagements aligned with the Paris Climate Accords of 2015.*

#### (4.11.8) Describe the process your organization has in place to ensure that your external engagement activities are consistent with your environmental commitments and/or transition plan

*Trane Technologies supports climate and sustainability policies, frequently providing technical support and formal comments during the stakeholder comment period of public policy to support climate action. When necessary, we counter unproductive messaging from trade associations and other companies through our formal engagement with policymakers.*

*[Fixed row]*

#### (4.11.1) On what policies, laws, or regulations that may (positively or negatively) impact the environment has your organization been engaging directly with policy makers in the reporting year?

Row 1

##### (4.11.1.1) Specify the policy, law, or regulation on which your organization is engaging with policy makers

Federal and state refrigerant policy (e.g., New York and Washington State); Enabling refrigerant use through state and local building code; ASHRAE Building and Equipment standards; global and local building policy; Air quality non-attainment zones NOx regulations; circularity; Enabling next generation refrigerant use (Canada, United States) building codes and transportation requirements; safety standards; renewable energy, energy efficiency, demand management etc.

#### (4.11.1.2) Environmental issues the policy, law, or regulation relates to

Select all that apply

- Climate change

#### (4.11.1.3) Focus area of policy, law, or regulation that may impact the environment

Low-impact production and innovation

- Low environmental impact innovation and R&D

#### (4.11.1.4) Geographic coverage of policy, law, or regulation

Select from:

- Global

#### (4.11.1.6) Your organization's position on the policy, law, or regulation

Select from:

- Support with minor exceptions

#### (4.11.1.7) Details of any exceptions and your organization's proposed alternative approach to the policy, law, or regulation

Minor technical corrections (e.g., safety standard adoption errors)

#### (4.11.1.8) Type of direct engagement with policy makers on this policy, law, or regulation

Select all that apply

- Ad-hoc meetings
- Regular meetings
- Discussion in public forums
- Participation in voluntary government programs
- Participation in working groups organized by policy makers

- Responding to consultations
- Submitting written proposals/inquiries

**(4.11.1.9) Funding figure your organization provided to policy makers in the reporting year relevant to this policy, law, or regulation (currency)**

0

**(4.11.1.10) Explain the relevance of this policy, law, or regulation to the achievement of your environmental commitments and/or transition plan, how this has informed your engagement, and how you measure the success of your engagement**

*Enabling transitions to products with a low carbon footprint is essential to Trane Technologies' strategy.*

**(4.11.1.11) Indicate if you have evaluated whether your organization's engagement on this policy, law, or regulation is aligned with global environmental treaties or policy goals**

*Select from:*

- Yes, we have evaluated, and it is aligned

**(4.11.1.12) Global environmental treaties or policy goals aligned with your organization's engagement on this policy, law or regulation**

*Select all that apply*

- Paris Agreement
- Another global environmental treaty or policy goal, please specify :Montreal Protocol

*[Add row]*

**(4.11.2) Provide details of your indirect engagement on policy, law, or regulation that may (positively or negatively) impact the environment through trade associations or other intermediary organizations or individuals in the reporting year.**

**Row 1**

#### **(4.11.2.1) Type of indirect engagement**

Select from:

- Indirect engagement via other intermediary organization or individual

#### **(4.11.2.2) Type of organization or individual**

Select from:

- Other, please specify :CEO-led organization

#### **(4.11.2.3) State the organization or position of individual**

*The World Business Council for Sustainable Development (WBCSD)*

#### **(4.11.2.5) Environmental issues relevant to the policies, laws, or regulations on which the organization or individual has taken a position**

Select all that apply

- Climate change

#### **(4.11.2.6) Indicate whether your organization's position is consistent with the organization or individual you engage with**

Select from:

- Consistent

#### **(4.11.2.7) Indicate whether your organization attempted to influence the organization or individual's position in the reporting year**

Select from:

- Yes, we publicly promoted their current position

#### **(4.11.2.8) Describe how your organization's position is consistent with or differs from the organization or individual's position, and any actions taken to influence their position**

The World Business Council for Sustainable Development (WBCSD) is comprised of over 200 of the world's leading sustainable businesses working collectively to accelerate the system transformations needed for a net zero, nature positive, and more equitable future by engaging executives and sustainability leaders from business and elsewhere to share practical insights on the obstacles and opportunities we currently face in tackling the integrated climate, nature and inequality sustainability challenge; by co-developing "how-to" CEO-guides from these insights; by providing science-based target guidance including standards and protocols; and by developing tools and platforms to help leading businesses in sustainability drive integrated actions to tackle climate, nature and inequality challenges across sectors and geographical regions.

#### (4.11.2.9) Funding figure your organization provided to this organization or individual in the reporting year (currency)

0

#### (4.11.2.11) Indicate if you have evaluated whether your organization's engagement is aligned with global environmental treaties or policy goals

Select from:

Yes, we have evaluated, and it is aligned

#### (4.11.2.12) Global environmental treaties or policy goals aligned with your organization's engagement on policy, law or regulation

Select all that apply

Paris Agreement

### Row 3

#### (4.11.2.1) Type of indirect engagement

Select from:

Indirect engagement via a trade association

#### (4.11.2.4) Trade association

Global

Other global trade association, please specify :Business Council for Sustainable Energy

#### **(4.11.2.5) Environmental issues relevant to the policies, laws, or regulations on which the organization or individual has taken a position**

Select all that apply

Climate change

#### **(4.11.2.6) Indicate whether your organization's position is consistent with the organization or individual you engage with**

Select from:

Consistent

#### **(4.11.2.7) Indicate whether your organization attempted to influence the organization or individual's position in the reporting year**

Select from:

Yes, we publicly promoted their current position

#### **(4.11.2.8) Describe how your organization's position is consistent with or differs from the organization or individual's position, and any actions taken to influence their position**

*The Business Council for Sustainable Energy (BCSE) is a coalition of companies and trade associations from the energy efficiency, natural gas and renewable energy sectors, and also includes independent electric power producers, investor-owned utilities, public power, commercial end-users and project developers and service providers for environmental markets. Industry leaders from the energy efficiency, renewable energy and natural gas sectors came together in 1992 to form a coalition dedicated to creating a more secure and sustainable energy future. Today, these sectors continue to work together to meet U.S. energy needs and revitalize the U.S. economy. The Business Council for Sustainable Energy works to: Enable policies that accelerate the deployment of energy efficiency, renewable energy resources and natural gas; Implement cost-effective programs and policies that recognize the environmental attributes of energy sources; Increase the efficiency of the economy and improve energy security; Encourage market-based initiatives for energy and environmental policies.*

#### **(4.11.2.9) Funding figure your organization provided to this organization or individual in the reporting year (currency)**

0

#### **(4.11.2.11) Indicate if you have evaluated whether your organization's engagement is aligned with global environmental treaties or policy goals**

Select from:

- Yes, we have evaluated, and it is aligned

#### **(4.11.2.12) Global environmental treaties or policy goals aligned with your organization's engagement on policy, law or regulation**

Select all that apply

- Paris Agreement

### **Row 4**

#### **(4.11.2.1) Type of indirect engagement**

Select from:

- Indirect engagement via a trade association

#### **(4.11.2.4) Trade association**

Global

- Other global trade association, please specify :C2ES

#### **(4.11.2.5) Environmental issues relevant to the policies, laws, or regulations on which the organization or individual has taken a position**

Select all that apply

- Climate change

#### **(4.11.2.6) Indicate whether your organization's position is consistent with the organization or individual you engage with**

Select from:

- Consistent

**(4.11.2.7) Indicate whether your organization attempted to influence the organization or individual's position in the reporting year**

Select from:

- Yes, and they have changed their position

**(4.11.2.8) Describe how your organization's position is consistent with or differs from the organization or individual's position, and any actions taken to influence their position**

*The Center for Climate and Energy Solutions (C2ES) is an independent, non-partisan, nonprofit organization focused on finding practical solutions to climate change. The organization works to advance strong policies and actions to reduce greenhouse gas emissions, promote clean energy, and strengthen resilience to climate impacts. They facilitate discussions and dialogues among policymakers, businesses, and other stakeholders to build consensus and foster collaboration.*

**(4.11.2.9) Funding figure your organization provided to this organization or individual in the reporting year (currency)**

0

**(4.11.2.11) Indicate if you have evaluated whether your organization's engagement is aligned with global environmental treaties or policy goals**

Select from:

- Yes, we have evaluated, and it is aligned

**(4.11.2.12) Global environmental treaties or policy goals aligned with your organization's engagement on policy, law or regulation**

Select all that apply

- Paris Agreement

[Add row]

**(4.12) Have you published information about your organization's response to environmental issues for this reporting year in places other than your CDP response?**

Select from:

Yes

**(4.12.1) Provide details on the information published about your organization's response to environmental issues for this reporting year in places other than your CDP response. Please attach the publication.**

## C5. Business strategy

(5.1) Does your organization use scenario analysis to identify environmental outcomes?

### Climate change

#### (5.1.1) Use of scenario analysis

Select from:

Yes

#### (5.1.2) Frequency of analysis

Select from:

Every three years or less frequently

### Water

#### (5.1.1) Use of scenario analysis

Select from:

No, but we plan to within the next two years

#### (5.1.3) Primary reason why your organization has not used scenario analysis

Select from:

Not an immediate strategic priority

#### (5.1.4) Explain why your organization has not used scenario analysis

*Water has not been identified as a highly material issue for us.*

*[Fixed row]*

## (5.1.1) Provide details of the scenarios used in your organization's scenario analysis.

### Climate change

#### (5.1.1.1) Scenario used

Climate transition scenarios

- IEA APS

#### (5.1.1.3) Approach to scenario

Select from:

- Qualitative and quantitative

#### (5.1.1.4) Scenario coverage

Select from:

- Organization-wide

#### (5.1.1.5) Risk types considered in scenario

Select all that apply

- Policy
- Market
- Reputation
- Technology
- Liability

#### (5.1.1.6) Temperature alignment of scenario

Select from:

- 1.6°C - 1.9°C

### (5.1.1.7) Reference year

2020

### (5.1.1.8) Timeframes covered

Select all that apply

- 2025
- 2030
- 2050

### (5.1.1.9) Driving forces in scenario

Local ecosystem asset interactions, dependencies and impacts

- Climate change (one of five drivers of nature change)

Regulators, legal and policy regimes

- Global regulation

### (5.1.1.10) Assumptions, uncertainties and constraints in scenario

*Scenarios were selected based on the following factors: - Peer benchmarking and leading industry practices - Alignment with Trane Technologies' SBTi and net zero target of limiting global temperature rise to no more than 1.5°C - Alignment with the Task Force on Climate-Related Financial Disclosures (TCFD) recommendations; for the use of multiple different pathways for scenario analysis, including a 2°C or lower scenario - Goal to evaluate Trane Technologies-specific future scenario impacts for energy use and demand - Scientifically backed scenarios for future modeling*

### (5.1.1.11) Rationale for choice of scenario

*This scenario was selected to represent aggressive climate action scenario aligned with limiting global average temperature rise to 2°C or below by the end of this century. Trane Technologies used the IEA's Announced Pledges Scenario (APS) as well as a NZE scenario.*

## Climate change

### (5.1.1.1) Scenario used

Climate transition scenarios

Customized publicly available climate transition scenario, please specify :Low Energy Demand IAMIC 1.5 C

### (5.1.1.3) Approach to scenario

Select from:

Qualitative and quantitative

### (5.1.1.4) Scenario coverage

Select from:

Organization-wide

### (5.1.1.5) Risk types considered in scenario

Select all that apply

Policy

Market

Reputation

Technology

Liability

### (5.1.1.6) Temperature alignment of scenario

Select from:

1.5°C or lower

### (5.1.1.7) Reference year

2020

### (5.1.1.8) Timeframes covered

Select all that apply

- 2025
- 2030
- 2050

### (5.1.1.9) Driving forces in scenario

Local ecosystem asset interactions, dependencies and impacts

- Climate change (one of five drivers of nature change)

Regulators, legal and policy regimes

- Global targets

### (5.1.1.10) Assumptions, uncertainties and constraints in scenario

*Scenarios were selected based on the following factors: - Peer benchmarking and leading industry practices - Alignment with Trane Technologies' SBTi and net zero target of limiting global temperature rise to no more than 1.5°C - Alignment with the Task Force on Climate-Related Financial Disclosures (TCFD) recommendations; for the use of multiple different pathways for scenario analysis, including a 2°C or lower scenario - Goal to evaluate Trane Technologies-specific future scenario impacts for energy use and demand - Scientifically backed scenarios for future modeling*

### (5.1.1.11) Rationale for choice of scenario

*This scenario envisions significant energy use reduction due to technology and policy developments and shows the market opportunity that may be captured by transition to low energy technologies.*

## Climate change

### (5.1.1.1) Scenario used

Physical climate scenarios

- RCP 8.5

### (5.1.1.2) Scenario used SSPs used in conjunction with scenario

Select from:

- SSP5

### (5.1.1.3) Approach to scenario

Select from:

- Qualitative and quantitative

### (5.1.1.4) Scenario coverage

Select from:

- Organization-wide

### (5.1.1.5) Risk types considered in scenario

Select all that apply

- Acute physical
- Chronic physical

- 2050

#### (5.1.1.9) Driving forces in scenario

Local ecosystem asset interactions, dependencies and impacts

- Speed of change (to state of nature and/or ecosystem services)
- Climate change (one of five drivers of nature change)

#### (5.1.1.10) Assumptions, uncertainties and constraints in scenario

*Scenarios were selected based on the following factors: - Peer benchmarking and leading industry practices - Alignment with Trane Technologies' SBTi and net zero target of limiting global temperature rise to no more than 1.5°C - Alignment with the Task Force on Climate-Related Financial Disclosures (TCFD) recommendations; for the use of multiple different pathways for scenario analysis, including a 2°C or lower scenario - Goal to evaluate Trane Technologies-specific future scenario impacts for energy use and demand - Scientifically backed scenarios for future modeling*

#### (5.1.1.11) Rationale for choice of scenario

*This scenario was selected to represent aggressive climate action scenario with policy to keep temperature in line with 1.5 °C.  
[Add row]*

## **(5.1.2) Provide details of the outcomes of your organization’s scenario analysis.**

### **Climate change**

#### **(5.1.2.1) Business processes influenced by your analysis of the reported scenarios**

*Select all that apply*

- Risk and opportunities identification, assessment and management
- Strategy and financial planning
- Resilience of business model and strategy
- Capacity building
- Target setting and transition planning

#### **(5.1.2.2) Coverage of analysis**

*Select from:*

- Organization-wide

#### **(5.1.2.3) Summarize the outcomes of the scenario analysis and any implications for other environmental issues**

*We address the question of how we are managing risk as it relates to climate change. Trane Technologies uses climate scenario analysis as one of many tools to assess potential impacts to the business. It enables enhanced preparedness for multiple futures under climate change and allows for consideration on level of impact climate change may have on operations, strategy, and financial planning. It also allows alignment for prioritization of strategy. >Through climate scenario analysis we now better understand the impacts of climate-related risks and opportunities. Trane Technologies may experience impacts on its business due to acute and chronic physical risks due to climate change, along with technology obsolescence or decreased demand and exposure to emerging GHG emissions regulations and taxation in the transition to a low-carbon economy. The risk of technology substitution and obsolescence due to increased demand for low-emissions and fuel-flexible, machinery, equipment, and heaters/coolers could result in the following impacts to Trane Technologies; - Decreased demand for products that are obsolete due to regulation or demand shifts - Increased R&D expenditures in new technologies The risk of exposure to emerging GHG emissions regulations and taxation due to advances in environmental and carbon policies could result in the following impacts to Trane Technologies: - Increased costs of compliance, increased R&D investments and stranded assets for products which do not meet regulatory requirements for environmentally safe and low GWP materials. - Decreased demand for products and services that do not meet regulatory requirements, specifically the use of refrigerants/refrigerant products >Based on the climate scenario analysis conducted in 2022, Trane Technologies believes we are well prepared to seize opportunities arising from climate change. In 2024, strategic choice that was made in*

alignment with the results of the scenario assessment was to develop and publicly share our Climate Transition Plan, that is aligned with a 1.5C future, details our plan to achieve approved SBT net zero targets, and details our target setting and transition planning process.

[Fixed row]

## **(5.2) Does your organization's strategy include a climate transition plan?**

### **(5.2.1) Transition plan**

Select from:

Yes, we have a climate transition plan which aligns with a 1.5°C world

### **(5.2.3) Publicly available climate transition plan**

Select from:

Yes

### **(5.2.4) Plan explicitly commits to cease all spending on, and revenue generation from, activities that contribute to fossil fuel expansion**

Select from:

No, and we do not plan to add an explicit commitment within the next two years

### **(5.2.6) Explain why your organization does not explicitly commit to cease all spending on and revenue generation from activities that contribute to fossil fuel expansion**

*Trane Technologies major levers for meeting Scope 3 SBTs include increasing sales of high efficiency equipment, expanding product mix to accelerate electrification, refrigerant transition management, and system-level energy efficiency.*

### **(5.2.7) Mechanism by which feedback is collected from shareholders on your climate transition plan**

Select from:

We have a different feedback mechanism in place

### **(5.2.8) Description of feedback mechanism**

*We conduct an annual engagement process with stakeholders to collect insight and feedback on relevant sustainability-related issues. We share our annual disclosures, including the annual Sustainability Report, externally, and request input from stakeholders on the disclosures and actions the Company is taking. Stakeholders are given the opportunity to respond or engage in further discussion with our executive management team. In addition, the Company routinely discusses sustainability issues with various stakeholders for ongoing feedback and communication.*

### **(5.2.9) Frequency of feedback collection**

Select from:

Annually

### **(5.2.10) Description of key assumptions and dependencies on which the transition plan relies**

*Our Climate Transition Plan dependencies and external factors include: market conditions, potential locked-in GHG emissions, extreme temperatures and weather events, policy and regulatory change, inconsistent climate legislation, technological developments, a lack of supplier climate action to reduce GHG emissions.*

### **(5.2.11) Description of progress against transition plan disclosed in current or previous reporting period**

*Each year, we will share key climate change mitigation and decarbonization actions taken, progress on our climate targets and metrics and updates on new decarbonization initiatives and low-carbon products. In 2024, compared to our 2019 baseline, we reduced Scope 1 and 2 emissions by 44% and for Scope 3, we reduced emissions per thermal ton of our products by 17%.*

### **(5.2.12) Attach any relevant documents which detail your climate transition plan (optional)**

*Trane Technologies-CTP.pdf*

### **(5.2.13) Other environmental issues that your climate transition plan considers**

Select all that apply

No other environmental issue considered

*[Fixed row]*

## **(5.3) Have environmental risks and opportunities affected your strategy and/or financial planning?**

### (5.3.1) Environmental risks and/or opportunities have affected your strategy and/or financial planning

Select from:

- Yes, both strategy and financial planning

### (5.3.2) Business areas where environmental risks and/or opportunities have affected your strategy

Select all that apply

- Products and services
- Upstream/downstream value chain
- Investment in R&D
- Operations

[Fixed row]

### (5.3.1) Describe where and how environmental risks and opportunities have affected your strategy.

#### Products and services

#### (5.3.1.1) Effect type

Select all that apply

- Risks
- Opportunities

#### (5.3.1.2) Environmental issues relevant to the risks and/or opportunities that have affected your strategy in this area

Select all that apply

- Climate change

#### (5.3.1.3) Describe how environmental risks and/or opportunities have affected your strategy in this area

*Our climate commitment requires us to offer a full line of next generation, lower global warming potential products by 2030 without compromising safety or energy efficiency. From 2021-2024 we are introducing high efficiency products that will aim to help us meet our gigaton challenge, which is reducing our customer carbon*

footprint by 1 gigaton, which includes our Scope 3 product emissions. From 2022-2024 we also have strategies in place to transition from high GWP refrigerants in advance of new regulations that may establish lower emission standards. Also, there continues to be a lack of consistent climate legislation, which creates economic and regulatory uncertainty. Such regulatory uncertainty extends to future incentives for energy efficient buildings and vehicles and costs of compliance, which may impact the demand for our products, obsolescence of our products and our results of operations. An example of a substantial decision and product related investments we have made is in the development of sustainable offerings, specifically in Trane CenTraVac chillers that can operate with either R-123 or with one of our next-generation refrigerants, R-514A or R-1233zd, both of which offer ultra-low GWP levels of less than 2. By offering multiple refrigerant options in our larger-tonnage chillers, we have the flexibility to better optimize solutions for our customers' application needs.

## Upstream/downstream value chain

### (5.3.1.1) Effect type

Select all that apply

- Risks
- Opportunities

### (5.3.1.2) Environmental issues relevant to the risks and/or opportunities that have affected your strategy in this area

Select all that apply

- Climate change

### (5.3.1.3) Describe how environmental risks and/or opportunities have affected your strategy in this area

We source raw materials and certain critical parts from suppliers around the world. Many sourced goods from suppliers originate in countries that are prone to physical climate risks associated with severe weather events and climate related disruptions. We have robust management processes in place to monitor our supply base to detect any such disruptions, which requires substantial managerial and technology investments. We also require suppliers to report on climate related targets such as energy usage and GHG emissions as a part of our sourcing selection. We use risk management and assessment tools to create transparency to such risks in the supplier eco-system.

## Investment in R&D

### (5.3.1.1) Effect type

Select all that apply

- Risks
- Opportunities

### (5.3.1.2) Environmental issues relevant to the risks and/or opportunities that have affected your strategy in this area

Select all that apply

Climate change

### (5.3.1.3) Describe how environmental risks and/or opportunities have affected your strategy in this area

*As regulations require changes in refrigerants, current products will have to be optimized or redesigned which increases our product development and marketing costs. Costs associated with refrigerant evaluation and development of technologies are primarily in R&D. As part of our global climate commitments we continue to invest in product-related research and development to catalyze the long-term reduction of GHG emissions industry-wide. One example is our strategic decision to invest in the development of lower GWP refrigerants like R-452B that can help the industry transition to lower GWP but still deliver strong safety and performance in a more sustainable way.*

## Operations

### (5.3.1.1) Effect type

Select all that apply

Risks

Opportunities

### (5.3.1.2) Environmental issues relevant to the risks and/or opportunities that have affected your strategy in this area

Select all that apply

Climate change

### (5.3.1.3) Describe how environmental risks and/or opportunities have affected your strategy in this area

*Trane Technologies understands the large role heating and cooling plays on the world's emissions (an estimated 15% of global emissions come from heating and cooling buildings) and therefore we have set strong goals based on climate science and aligned with SBTi. As part of our 2030 Sustainability Commitments, we are targeting carbon neutral operations, net positive water in water stressed areas and zero waste to landfill. In order to support the green energy transition we also have committed to achieving 10% absolute energy reduction by 2030 as well as 100% renewable energy by 2040. All of these commitments and related actions are to enable a low carbon economy. These sustainability objectives for our operations have been incorporated as central tenets of our enterprise strategy. All businesses have incorporated these goals into their strategies.*

[Add row]

## (5.3.2) Describe where and how environmental risks and opportunities have affected your financial planning.

### Row 1

#### (5.3.2.1) Financial planning elements that have been affected

Select all that apply

Revenues

#### (5.3.2.2) Effect type

Select all that apply

Risks

Opportunities

#### (5.3.2.3) Environmental issues relevant to the risks and/or opportunities that have affected these financial planning elements

Select all that apply

Climate change

#### (5.3.2.4) Describe how environmental risks and/or opportunities have affected these financial planning elements

*We establish targets at the Business Unit (BU) level for revenue and performance related to emissions reductions from our products and solutions. Each BU develops a plan for meeting the target through our portfolio of products designed to lower environmental impact with next generation, low global warming potential refrigerants and high efficiency operation. As part of our annual and 3 year planning process, we focus our investment prioritization decisions on a variety of factors, including the impact of proposed investments on our ability to deliver on our sustainability commitments. Investments in products and plants are favorably considered if they advance our sustainability objectives. The businesses are encouraged to shift their product and service offerings that advance our commitments to energy efficiency and sustainability through reduction of emissions. Our plans extend such prioritization beyond internal organic growth initiatives to include customer choices that favor reduction of greenhouse gas emissions and also acquisition target evaluations.*

[Add row]

## (5.4) In your organization's financial accounting, do you identify spending/revenue that is aligned with your organization's climate transition?

	<b>Identification of spending/revenue that is aligned with your organization's climate transition</b>
	<i>Select from:</i> <input checked="" type="checkbox"/> No, but we plan to in the next two years

[Fixed row]

**(5.5) Does your organization invest in research and development (R&D) of low-carbon products or services related to your sector activities?**

**(5.5.1) Investment in low-carbon R&D**

*Select from:*

Yes

**(5.5.2) Comment**

*In 2024, we spent \$309.6 million on research and development, focused on product and system sustainability improvements such as increasing energy efficiency, developing products that allow for use of lower global warming potential refrigerants, reducing material content in products, and designing products for circularity. New product development (NPD) programs complete a Design for Sustainability module within our NPD process to ensure that programs consider environmental impact. We also have a strong focus on sustaining activities, which include costs incurred to reduce production costs, improve existing products, create custom solutions for customers and provide support to our manufacturing facilities. We anticipate that we will continue to make significant expenditures for research and development and sustaining activities to maintain and improve our competitive position.*

[Fixed row]

**(5.5.2) Provide details of your organization's investments in low-carbon R&D for capital goods products and services over the last three years.**

**Row 1**

### (5.5.2.1) Technology area

Select from:

Other, please specify :Product and system sustainability improvements such as increasing energy efficiency, developing products that allow for use of lower global warming potential refrigerants, reducing material content in products, and designing products for circularity

### (5.5.2.2) Stage of development in the reporting year

Select from:

Small scale commercial deployment

### (5.5.2.3) Average % of total R&D investment over the last 3 years

100

### (5.5.2.4) R&D investment figure in the reporting year (unit currency as selected in 1.2) (optional)

310000000

### (5.5.2.5) Average % of total R&D investment planned over the next 5 years

100

### (5.5.2.6) Explain how your R&D investment in this technology area is aligned with your climate commitments and/or climate transition plan

*The Company conducts research and development activities focused on product and system sustainability improvements such as increasing energy efficiency, developing products that allow for use of lower global warming potential refrigerants, reducing material content in products, and designing products for circularity.*  
[Add row]

**(5.9) What is the trend in your organization's water-related capital expenditure (CAPEX) and operating expenditure (OPEX) for the reporting year, and the anticipated trend for the next reporting year?**

No

**(5.10.1.14) % total emissions in the reporting year in selected scopes this internal price covers**

100

**(5.10.1.15) Pricing approach is monitored and evaluated to achieve objectives**

Select from:

Yes

**(5.10.1.16) Details of how the pricing approach is monitored and evaluated to achieve your objectives**

We use an internal carbon shadow price to perform scenario assessments for climate transition planning. For example, for climate scenario assessment we chose to assess the risk from potential exposure to regulations and taxation due to advances in environmental and carbon policies as a relevant risk for analysis. Under the global energy transition to a lower-emissions economy, jurisdictions across the world are increasing scrutiny around emissions reporting and environmental regulation. This may require our products to meet certain requirements for emissions, potentially increasing manufacturing and associated reporting costs for select jurisdictions. Additionally, many jurisdictions around the world have instituted or considered instituting pricing carbon emissions. As manufacturer of certain products that emit GHGs, Trane Technologies faces risks of increases costs for operating across its large geographic footprint.

[Fixed row]

#### (5.11.1) Does your organization assess and classify suppliers according to their dependencies and/or impacts on the environment?

##### Climate change

### (5.11.1.1) Assessment of supplier dependencies and/or impacts on the environment

Select from:

- Yes, we assess the dependencies and/or impacts of our suppliers

### (5.11.1.2) Criteria for assessing supplier dependencies and/or impacts on the environment

Select all that apply

- Contribution to supplier-related Scope 3 emissions

### (5.11.1.3) % Tier 1 suppliers assessed

Select from:

- 1-25%

### (5.11.1.4) Define a threshold for classifying suppliers as having substantive dependencies and/or impacts on the environment

*We annually assess our Significant Suppliers on environmental impacts, focusing on GHG emissions, water, and waste. These suppliers, identified by their high carbon output and representing 53% of spend, have the largest impact on embodied carbon reductions. We work with them to support emissions reduction and understand embodied carbon in our products. Also, in 2024, all new direct material suppliers in N. America were screened using environmental criteria via Supplier System Assessment audits.*

### (5.11.1.5) % Tier 1 suppliers meeting the threshold for substantive dependencies and/or impacts on the environment

Select from:

- 100%

### (5.11.1.6) Number of Tier 1 suppliers meeting the thresholds for substantive dependencies and/or impacts on the environment

179

**Water**

### (5.11.1.1) Assessment of supplier dependencies and/or impacts on the environment

Select from:

- Yes, we assess the dependencies and/or impacts of our suppliers

### (5.11.1.2) Criteria for assessing supplier dependencies and/or impacts on the environment

Select all that apply

- Impact on water availability

### (5.11.1.3) % Tier 1 suppliers assessed

Select from:

- 1-25%

### (5.11.1.4) Define a threshold for classifying suppliers as having substantive dependencies and/or impacts on the environment

*We annually survey significant suppliers, representing 53% of spend, on their environmental impacts, focusing on energy, water, waste, and carbon emissions. We ensure alignment with our standards through periodic data collection, training workshops, and best practice webinars. Supplier responses are benchmarked against our standards and based on the results; we find opportunities to provide support and implement action plans to help them continue to drive progress.*

### (5.11.1.5) % Tier 1 suppliers meeting the threshold for substantive dependencies and/or impacts on the environment

Select from:

- 100%

### (5.11.1.6) Number of Tier 1 suppliers meeting the thresholds for substantive dependencies and/or impacts on the environment

179

[Fixed row]

### (5.11.2) Does your organization prioritize which suppliers to engage with on environmental issues?

## Climate change

### (5.11.2.1) Supplier engagement prioritization on this environmental issue

Select from:

- Yes, we prioritize which suppliers to engage with on this environmental issue

### (5.11.2.2) Criteria informing which suppliers are prioritized for engagement on this environmental issue

Select all that apply

- Material sourcing
- Procurement spend
- Regulatory compliance
- Business risk mitigation
- Product safety and compliance
- In line with the criteria used to classify suppliers as having substantive dependencies and/or impacts relating to climate change

### (5.11.2.4) Please explain

*Trane Technologies' Business Partner Code of Conduct (BPCoC) applies to all suppliers doing business with us. It communicates our expectation that suppliers operate ethically and comply fully with our standards, holding their own suppliers to the same high standards. Beyond the principles outlined in the BPCoC, we encourage suppliers to work toward sustainable business practices specified in our Supplier Sustainability Expectations and Sustainable Procurement Policy. We collaborate with key suppliers to support their emissions reduction goals and understand embodied carbon in the products we purchase. We engage with specific suppliers on sustainability projects such as conversion of virgin resins to recycled material. To monitor supplier EHS performance and sustainability efforts, we use a third-party platform that provides transparency into supplier performance relative to our standards. Through our ESG Survey, sent to significant suppliers, we gather insights into energy management, emissions reduction, waste handling and water usage. Significant suppliers are identified based on their risk of negative environmental impacts due to large quantities of carbon produced from their products in our value chain, representing 53% of spend. All significant suppliers are enrolled in the sustainability reporting platform and capacity-building programs. We do not maintain relationships with suppliers who fail to uphold our BPCoC, meet our quality standards, or violate labor standards.*

## Water

### (5.11.2.1) Supplier engagement prioritization on this environmental issue

Select from:

- Yes, we prioritize which suppliers to engage with on this environmental issue

#### (5.11.2.2) Criteria informing which suppliers are prioritized for engagement on this environmental issue

Select all that apply

- Material sourcing
- Procurement spend
- Regulatory compliance
- Business risk mitigation
- Product safety and compliance
- In line with the criteria used to classify suppliers as having substantive dependencies and/or impacts relating to water

#### (5.11.2.4) Please explain

*Trane Technologies' Business Partner Code of Conduct (BPCoC) applies to all suppliers doing business with us. It communicates our expectation that suppliers operate ethically and comply fully with our standards, holding their own suppliers to the same high standards. Beyond the ethical principles outlined in the BPCoC, we encourage suppliers to work toward sustainable business practices specified in our Supplier Sustainability Expectations and Sustainable Procurement Policy. We support suppliers by sharing best practices in areas such as resource conservation and sustainable packaging. We also collaborate with key suppliers to support their emissions reduction goals and understand embodied carbon in the products we purchase. To monitor supplier EHS performance and sustainability efforts, we use a third-party platform that provides transparency into supplier performance relative to our standards. Through our Supplier Sustainability Survey, sent to significant suppliers, we gather insights into energy management, emissions reduction, waste handling, water usage, and other social and governance-related practices. Significant suppliers are identified based on their risk of negative environmental impacts due to large quantities of carbon produced from their products in our value chain, representing 53% of spend. We do not maintain relationships with suppliers who fail to uphold our BPCoC, meet our quality standards, or violate labor standards.*

If a supplier refuses or is unable to correct the non-conformance to our satisfaction, we may terminate the relationship as a last resort. Our Supplier System Assessment*

*(SSA) audits assess site-specific sustainability and business continuity risks. A dedicated team of experts in each region manages the process, which examines various risk categories such as quality management, environmental stewardship, human rights, labor relations, sub-supplier oversight, and supply chain evaluation.*  
[Add row]

## **(5.11.7) Provide further details of your organization’s supplier engagement on environmental issues.**

### **Climate change**

#### **(5.11.7.2) Action driven by supplier engagement**

Select from:

- Emissions reduction

#### **(5.11.7.3) Type and details of engagement**

##### Capacity building

- Develop or distribute resources on how to map upstream value chain
- Provide training, support and best practices on how to measure GHG emissions
- Provide training, support and best practices on how to mitigate environmental impact
- Provide training, support and best practices on how to set science-based targets
- Support suppliers to set their own environmental commitments across their operations

##### Financial incentives

- Feature environmental performance in supplier awards scheme

##### Information collection

- Collect GHG emissions data at least annually from suppliers
- Collect targets information at least annually from suppliers
- Collect climate transition plan information at least annually from suppliers
- Collect environmental risk and opportunity information at least annually from suppliers
- Collect water quantity information at least annually from suppliers (e.g., withdrawal and discharge volumes)
- Collect water quality information at least annually from suppliers (e.g., discharge quality, pollution incidents, hazardous substances)

## Innovation and collaboration

- Collaborate with suppliers on innovations to reduce environmental impacts in products and services
- Collaborate with suppliers on innovative business models and corporate renewable energy sourcing mechanisms
- Collaborate with suppliers to develop reuse infrastructure and reuse models
- Facilitate adoption of a unified climate transition approach with suppliers
- Invest jointly with suppliers in R&D of relevant low-carbon technologies

### (5.11.7.4) Upstream value chain coverage

Select all that apply

- Tier 1 suppliers

### (5.11.7.5) % of tier 1 suppliers by procurement spend covered by engagement

Select from:

- 51-75%

### (5.11.7.6) % of tier 1 supplier-related scope 3 emissions covered by engagement

Select from:

- 51-75%

### (5.11.7.9) Describe the engagement and explain the effect of your engagement on the selected environmental action

*In 2024, we introduced a new and enhanced Supplier Sustainability Survey to better track our suppliers' progress on their sustainability commitments and provide educational support to assist them with their sustainability initiatives. The updated survey includes specific modules that align with our sustainability strategy. New data analytics features provide a grading and scoring system, allowing us to monitor progress over time. This improved survey strengthens our relationships with high-performing suppliers and facilitates meaningful conversations with those who are still developing their sustainability initiatives, enabling us to better understand and support their needs. Our Supplier System Assessment (SSA) audits assess site-specific sustainability and business continuity risks. A dedicated team of experts in each region manages the SSA process, which examines various risk categories such as quality management, environmental stewardship, human rights, labor relations, cybersecurity, product and safety compliance, sub-supplier oversight, and supply chain evaluation.*

### (5.11.7.10) Engagement is helping your tier 1 suppliers meet an environmental requirement related to this environmental issue

Select from:

Yes, please specify the environmental requirement :As stated in our Supplier Sustainability Expectations, Suppliers will work to conserve their consumption of energy, water, and other natural resources. Specifically, suppliers should have programs for: Energy Management and Water Conservation.

### (5.11.7.11) Engagement is helping your tier 1 suppliers engage with their own suppliers on the selected action

Select from:

Yes

## Water

### (5.11.7.2) Action driven by supplier engagement

Select from:

Waste and resource reduction and improved end-of-life management

### (5.11.7.3) Type and details of engagement

#### Capacity building

- Develop or distribute resources on how to map upstream value chain
- Provide training, support and best practices on how to mitigate environmental impact
- Support suppliers to set their own environmental commitments across their operations

#### Financial incentives

- Feature environmental performance in supplier awards scheme

#### Information collection

- Collect climate transition plan information at least annually from suppliers
- Collect environmental risk and opportunity information at least annually from suppliers
- Collect water quality information at least annually from suppliers (e.g., discharge quality, pollution incidents, hazardous substances)
- Collect water quantity information at least annually from suppliers (e.g., withdrawal and discharge volumes)

### (5.11.7.4) Upstream value chain coverage

Select all that apply

Tier 1 suppliers

#### (5.11.7.5) % of tier 1 suppliers by procurement spend covered by engagement

Select from:

51-75%

#### (5.11.7.7) % tier 1 suppliers with substantive impacts and/or dependencies related to this environmental issue covered by engagement

Select from:

51-75%

#### (5.11.7.9) Describe the engagement and explain the effect of your engagement on the selected environmental action

*In 2024, we introduced a new and enhanced Supplier Sustainability Survey to better track our suppliers' progress on their sustainability commitments and provide educational support to assist them with their sustainability initiatives. The updated survey includes specific modules that align with our sustainability strategy. New data analytics features provide a grading and scoring system, allowing us to monitor progress over time. This improved survey strengthens our relationships with high-performing suppliers and facilitates meaningful conversations with those who are still developing their sustainability initiatives, enabling us to better understand and support their needs. Our Supplier System Assessment (SSA) audits assess site-specific sustainability and business continuity risks. A dedicated team of experts in each region manages the SSA process, which examines various risk categories such as quality management, environmental stewardship, human rights, labor relations, cybersecurity, product and safety compliance, sub-supplier oversight, and supply chain evaluation.*

#### (5.11.7.10) Engagement is helping your tier 1 suppliers meet an environmental requirement related to this environmental issue

Select from:

Yes, please specify the environmental requirement :As stated in our Supplier Sustainability Expectations, Suppliers will work to conserve their consumption of energy, water, and other natural resources. Specifically, suppliers should have programs for: Energy Management and Water Conservation.

#### (5.11.7.11) Engagement is helping your tier 1 suppliers engage with their own suppliers on the selected action

Select from:

Yes

[Add row]

## **(5.11.9) Provide details of any environmental engagement activity with other stakeholders in the value chain.**

### **Climate change**

#### **(5.11.9.1) Type of stakeholder**

Select from:

- Customers

#### **(5.11.9.2) Type and details of engagement**

##### Education/Information sharing

- Educate and work with stakeholders on understanding and measuring exposure to environmental risks
- Run an engagement campaign to educate stakeholders about the environmental impacts about your products, goods and/or services
- Share information about your products and relevant certification schemes
- Share information on environmental initiatives, progress and achievements

##### Innovation and collaboration

- Align your organization's goals to support customers' targets and ambitions

#### **(5.11.9.3) % of stakeholder type engaged**

Select from:

- 100%

#### **(5.11.9.4) % stakeholder-associated scope 3 emissions**

Select from:

- 100%

### **(5.11.9.5) Rationale for engaging these stakeholders and scope of engagement**

*All customers are in scope for this engagement because our Gigaton Challenge aims to reduce our full customer carbon footprint by 1 gigaton of emissions. We do this by calculating emissions from all products sold within the reporting year, so every customer is crucial to success of the engagement.*

### **(5.11.9.6) Effect of engagement and measures of success**

*Trane Technologies' "Gigaton Challenge" is our commitment to reduce one gigaton of emissions from our customer carbon footprint. Every year, Trane Technologies calculates the reduction in product emissions and emissions avoided through services for that year. Our goal is to have the cumulative annual contributions add up to 1 gigaton of GHG emissions (1 billion mtCO<sub>2</sub>e) by 2030. Our calculations cover our complete product portfolio of over a million configured and non-configured products. We made the conscious decision to set 2019 as our baseline year, rather than selecting an earlier year than 2019, because the planet needs our industry to change now. Our ambition is to make a significant impact as quickly as possible. At the conclusion of 2024, we had reduced our customer carbon footprint by 237 million mtCO<sub>2</sub>e since our baseline year of 2019, reflecting a successful measurement of our engagement.*

*[Add row]*

## C6. Environmental Performance - Consolidation Approach

(6.1) Provide details on your chosen consolidation approach for the calculation of environmental performance data.

### Climate change

#### (6.1.1) Consolidation approach used

Select from:

Financial control

#### (6.1.2) Provide the rationale for the choice of consolidation approach

*We define our organizational boundary using the financial control approach and report on GHG emissions using the GHG Protocol. We believe this most accurately reflects the direct impact of our operational footprint.*

### Water

#### (6.1.1) Consolidation approach used

Select from:

Financial control

#### (6.1.2) Provide the rationale for the choice of consolidation approach

*We define our organizational boundary using the financial control approach. We believe this most accurately reflects the direct impact of our operational footprint*

### Plastics

#### (6.1.1) Consolidation approach used

Select from:

Other, please specify :We have not chosen a consolidation approach for plastics.

## (6.1.2) Provide the rationale for the choice of consolidation approach

*We have not yet evaluated environmental impacts related to plastics.*

### **Biodiversity**

## (6.1.1) Consolidation approach used

*Select from:*

Other, please specify :We have not chosen a consolidation approach for biodiversity

## (6.1.2) Provide the rationale for the choice of consolidation approach

*We have not yet evaluated environmental impacts related to biodiversity.*

*[Fixed row]*

## C7. Environmental performance - Climate Change

### (7.1) Is this your first year of reporting emissions data to CDP?

Select from:

No

### (7.1.1) Has your organization undergone any structural changes in the reporting year, or are any previous structural changes being accounted for in this disclosure of emissions data?

#### (7.1.1.1) Has there been a structural change?

Select all that apply

Yes, other structural change, please specify :Facility closure

#### (7.1.1.2) Name of organization(s) acquired, divested from, or merged with

*Facilities closure*

#### (7.1.1.3) Details of structural change(s), including completion dates

*At the end of 2023, two factories were closed. The locations include Brampton, Ontario, Canada, and Curitiba, Brazil. Their respective environmental data remains in our reporting profile for 2023 but no data was reported for 2024.*

*[Fixed row]*

### (7.1.2) Has your emissions accounting methodology, boundary, and/or reporting year definition changed in the reporting year?

### (7.1.2.1) Change(s) in methodology, boundary, and/or reporting year definition?

Select all that apply

- Yes, a change in boundary

### (7.1.2.2) Details of methodology, boundary, and/or reporting year definition change(s)

*No changes in methodologies. As referenced for question 7.1.2, two factories were closed at the end of 2023. Their environmental data remains through 2023 but no data is reported for 2024.*

*[Fixed row]*

### (7.1.3) Have your organization's base year emissions and past years' emissions been recalculated as a result of any changes or errors reported in 7.1.1 and/or 7.1.2?

#### (7.1.3.1) Base year recalculation

Select from:

- No, because the impact does not meet our significance threshold

#### (7.1.3.3) Base year emissions recalculation policy, including significance threshold

*Closure of the two small factories at the end of 2023 is insignificant relate to the base year emissions. For these two sites, removing their Scope 1 and 2 emissions from the base year inventory represents a reduction of total base year emissions by -0.4%. Not a meaningful change, no need to update the base year data.*

#### (7.1.3.4) Past years' recalculation

Select from:

- No

*[Fixed row]*

## **(7.2) Select the name of the standard, protocol, or methodology you have used to collect activity data and calculate emissions.**

Select all that apply

- ISO 14064-1
- The Greenhouse Gas Protocol: Scope 2 Guidance
- The Climate Registry: General Reporting Protocol
- The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition)
- US EPA Center for Corporate Climate Leadership: Direct Emissions from Mobile Combustion Sources
- US EPA Center for Corporate Climate Leadership: Direct Emissions from Stationary Combustion Sources

## **(7.3) Describe your organization's approach to reporting Scope 2 emissions.**

### **(7.3.1) Scope 2, location-based**

Select from:

- We are reporting a Scope 2, location-based figure

### **(7.3.2) Scope 2, market-based**

Select from:

- We are reporting a Scope 2, market-based figure

### **(7.3.3) Comment**

*Trane Technologies calculates annual, indirect Scope 2 GHG emissions for both location-based and market-based. Our calculations utilize the total electricity used to operate each facility within our GHG reporting framework. The electricity activity data for both sets of calculations includes the purchased electricity provided by our power suppliers, with adjustments incorporated to account for onsite photovoltaic electricity generation systems. The market-based calculations also accommodate Scope 2 GHG improvements realized through the purchase of 100% renewable/zero carbon electricity from some suppliers/locations and zero carbon electricity benefits from the retirement of Renewable Energy Credits. For location-based GHG emission factors, Trane Technologies utilizes the eGrid factors published by the US EPA for US locations and the annual electricity emissions factors available from the International Energy Agency (IEA). Market-based factors are obtained from our power suppliers where available or drawn from the various Residual Mix factor sets.*

*[Fixed row]*

**(7.4) Are there any sources (e.g. facilities, specific GHGs, activities, geographies, etc.) of Scope 1, Scope 2 or Scope 3 emissions that are within your selected reporting boundary which are not included in your disclosure?**

Select from:

No

**(7.5) Provide your base year and base year emissions.**

### **Scope 1**

#### **(7.5.1) Base year end**

12/31/2019

#### **(7.5.2) Base year emissions (metric tons CO2e)**

319240

#### **(7.5.3) Methodological details**

*Scope 1 carbon calculated for direct usage of fossil fuels and fugitive losses of refrigerants from process/comfort cooling equipment. Scope 1 refrigerant carbon also calculated for losses at our manufacturing facilities during the charging/use of refrigerants added to finished goods during manufacturing. Fossil fuels consider material use at our factories as well as gasoline/diesel used by our sales & service vehicles. Carbon emissions are calculated using published carbon emission factors and the material usage or loss.*

### **Scope 2 (location-based)**

#### **(7.5.1) Base year end**

12/31/2019

#### **(7.5.2) Base year emissions (metric tons CO2e)**

### (7.5.3) Methodological details

*Scope 2 location-based emissions are calculated using purchased electricity data and the published emission factors. The factors are from either the US EPA eGRID factors or from the International Energy Association's annual factor reports.*

### Scope 2 (market-based)

#### (7.5.1) Base year end

12/31/2019

#### (7.5.2) Base year emissions (metric tons CO2e)

123500

### (7.5.3) Methodological details

*Scope 2 market-based emissions are calculated using purchased electricity data and the published emission factors. The factors are collected from generation reports published by the power company who provides electricity to our locations. Where supplier factors are unavailable, residual mix factors are used.*

### Scope 3 category 1: Purchased goods and services

#### (7.5.1) Base year end

12/31/2019

#### (7.5.2) Base year emissions (metric tons CO2e)

4137149

### (7.5.3) Methodological details

*We use GHG protocol to calculate emissions from this category.*

## Scope 3 category 2: Capital goods

### (7.5.1) Base year end

12/31/2019

### (7.5.2) Base year emissions (metric tons CO2e)

0

### (7.5.3) Methodological details

0

## (7.5.3) Methodological details

*We do not have emissions from this category.  
[Fixed row]*

## (7.6) What were your organization's gross global Scope 1 emissions in metric tons CO2e?

### Reporting year

## (7.6.1) Gross global Scope 1 emissions (metric tons CO2e)

204962

## (7.6.3) Methodological details

*Scope 1 carbon calculated for direct usage of fossil fuels and fugitive losses of refrigerants from process/comfort cooling equipment. Scope 1 refrigerant carbon also calculated for losses at our manufacturing facilities during the charging/use of refrigerants added to finished goods during manufacturing. Fossil fuels include fuels used at our factories as well as gasoline/diesel used by our sales & service vehicles. Carbon emissions are calculated using published carbon emission factors and the material usage or loss.*

*[Fixed row]*

## (7.7) What were your organization's gross global Scope 2 emissions in metric tons CO2e?

### Reporting year

## (7.7.1) Gross global Scope 2, location-based emissions (metric tons CO2e)

116834

## (7.7.2) Gross global Scope 2, market-based emissions (metric tons CO2e)

#### (7.7.4) Methodological details

Scope 2 location-based emissions are calculated using purchased electricity data and the published emission factors. The factors are from either the US EPA eGRID factors or from the International Energy Association's annual factor reports. Scope 2 market-based emissions are calculated using purchased electricity data and the published emission factors. The factors are collected from generation reports published by the power company who provides electricity to our locations. Where supplier factors are unavailable, residual mix factors are used. The market-based emissions are adjusted in some cases to account for application of Renewable Energy Credits / Guarantee of Origin.

[Fixed row]

### (7.8) Account for your organization's gross global Scope 3 emissions, disclosing and explaining any exclusions.

#### Purchased goods and services

##### (7.8.1) Evaluation status

Select from:

Relevant, calculated

##### (7.8.2) Emissions in reporting year (metric tons CO2e)

3702910

##### (7.8.3) Emissions calculation methodology

Select all that apply

Hybrid method

##### (7.8.4) Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

##### (7.8.5) Please explain

We use a hybrid approach of spend-based and weight-based method as detailed in the Scope 3 calculation guidance for 'Purchased Goods and Services.'

## Capital goods

### (7.8.1) Evaluation status

Select from:

Not relevant, explanation provided

### (7.8.5) Please explain

*Based on our 2019 baseline, emissions from Capital goods are less than 1% of our total Scope 3 emissions and are deemed not relevant.*

## Fuel-and-energy-related activities (not included in Scope 1 or 2)

### (7.8.1) Evaluation status

Select from:

Not relevant, explanation provided

### (7.8.5) Please explain

*Based on our 2019 baseline, emissions from fuel-and-energy-related activities are less than 1% of our total Scope 3 emissions, therefore are deemed not relevant.*

## Upstream transportation and distribution

### (7.8.1) Evaluation status

Select from:

Not relevant, explanation provided

### (7.8.5) Please explain

*Based on our 2019 baseline, emissions from upstream transportation and distribution are less than 1% of our total Scope 3 emissions, therefore are deemed not relevant.*

## Waste generated in operations

### (7.8.1) Evaluation status

Select from:

Not relevant, explanation provided

### (7.8.5) Please explain

*Based on our 2019 baseline, emissions from waste generated in operations are less than 1% of our total Scope 3 emissions and are deemed not relevant.*

## Business travel

### (7.8.1) Evaluation status

Select from:

Not relevant, explanation provided

### (7.8.5) Please explain

*Based on our 2019 baseline, emissions from business travel are less than 1% of our total Scope 3 emissions, therefore are deemed not relevant.*

## Employee commuting

### (7.8.1) Evaluation status

Select from:

Not relevant, explanation provided

### (7.8.5) Please explain

*Based on our 2019 baseline, emissions from employee commuting are less than 1% of our total Scope 3 emissions and are deemed not relevant.*

## Upstream leased assets

### (7.8.1) Evaluation status

Select from:

Not relevant, explanation provided

### (7.8.5) Please explain

*Based on our 2019 baseline, emissions from upstream leased assets are less than 1% of our total Scope 3 emissions, therefore are deemed not relevant.*

## Downstream transportation and distribution

### (7.8.1) Evaluation status

Select from:

Not relevant, explanation provided

### (7.8.5) Please explain

*Based on our 2019 baseline, emissions from downstream transportation and distribution are less than 1% of our total Scope 3 emissions and are deemed not relevant.*

## Processing of sold products

### (7.8.1) Evaluation status

Select from:

Not relevant, explanation provided

### (7.8.5) Please explain

*Trane Technologies did not sell any intermediate products which required further processing in the reporting year.*

## Use of sold products

### (7.8.1) Evaluation status

Select from:

- Relevant, calculated

### (7.8.2) Emissions in reporting year (metric tons CO2e)

234000000

### (7.8.3) Emissions calculation methodology

Select all that apply

- Fuel-based method
- Asset-specific method
- Site-specific method

### (7.8.4) Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

### (7.8.5) Please explain

*We calculate all the emissions from each product sold, for the lifespan of that product. Emissions include energy sources as well as refrigerants and are location-specific. We have received third party assurance on this category.*

## End of life treatment of sold products

### (7.8.1) Evaluation status

Select from:

- Not relevant, explanation provided

### (7.8.5) Please explain

*Based on our 2019 baseline, emissions from end of life of products are less than 1% of our total Scope 3 emissions and are deemed not relevant.*

## Downstream leased assets

### (7.8.1) Evaluation status

Select from:

Not relevant, explanation provided

### (7.8.5) Please explain

*We do not have downstream leased assets which generate emissions.*

## Franchises

### (7.8.1) Evaluation status

Select from:

## **(7.10) How do your gross global emissions (Scope 1 and 2 combined) for the reporting year compare to those of the previous reporting year?**

Select from:

Increased

**(7.10.1) Identify the reasons for any change in your gross global emissions (Scope 1 and 2 combined), and for each of them specify how your emissions compare to the previous year.**

### **Change in renewable energy consumption**

#### **(7.10.1.1) Change in emissions (metric tons CO2e)**

2055.97

#### **(7.10.1.2) Direction of change in emissions**

Select from:

Decreased

#### **(7.10.1.3) Emissions value (percentage)**

0.83

#### **(7.10.1.4) Please explain calculation**

*Scope 2 GHG change for 2024 vs 2023 is calculated using the change in renewal energy usage year-over-year multiplied by the market-based Scope 2 GHG factors for the specific locations.*

### **Other emissions reduction activities**

#### **(7.10.1.1) Change in emissions (metric tons CO2e)**

1018.64

### (7.10.1.2) Direction of change in emissions

Select from:

Decreased

### (7.10.1.3) Emissions value (percentage)

0.41

### (7.10.1.4) Please explain calculation

*Company-wide action to shift to use of lower global warming potential refrigerants charged to finished goods. Calculated by using the AR5 GWP factor and the associated refrigerant losses.*

## Divestment

### (7.10.1.1) Change in emissions (metric tons CO2e)

0

### (7.10.1.2) Direction of change in emissions

Select from:

No change

### (7.10.1.3) Emissions value (percentage)

0

### (7.10.1.4) Please explain calculation

*No divestments*

## Acquisitions

**(7.10.1.1) Change in emissions (metric tons CO2e)**

0

**(7.10.1.2) Direction of change in emissions**

Select from:

No change

**(7.10.1.3) Emissions value (percentage)**

0

**(7.10.1.4) Please explain calculation**

*No acquisitions*

**Mergers**

**(7.10.1.1) Change in emissions (metric tons CO2e)**

0

**(7.10.1.4) Please explain calculation**

*No mergers.*

## Change in output

### (7.10.1.1) Change in emissions (metric tons CO2e)

2572

### (7.10.1.2) Direction of change in emissions

Select from:

Increased

### (7.10.1.3) Emissions value (percentage)

1.03

### (7.10.1.4) Please explain calculation

*Scope 1 and 2 emissions increased for 2024 vs. 2023 at a rate of 1.03%.*

## Change in methodology

### (7.10.1.1) Change in emissions (metric tons CO2e)

0

### (7.10.1.2) Direction of change in emissions

Select from:

No change

### (7.10.1.3) Emissions value (percentage)

0

### (7.10.1.4) Please explain calculation

*No change in methodology*

## **Change in boundary**

### **(7.10.1.1) Change in emissions (metric tons CO2e)**

0

### **(7.10.1.2) Direction of change in emissions**

*Select from:*

No change

### **(7.10.1.3) Emissions value (percentage)**

0

### **(7.10.1.4) Please explain calculation**

*No change in boundary*

## **Change in physical operating conditions**

### **(7.10.1.1) Change in emissions (metric tons CO2e)**

0

### **(7.10.1.2) Direction of change in emissions**

*Select from:*

No change

### **(7.10.1.3) Emissions value (percentage)**

0

#### (7.10.1.4) Please explain calculation

*No change in physical conditions.*

### Unidentified

#### (7.10.1.1) Change in emissions (metric tons CO2e)

0

#### (7.10.1.2) Direction of change in emissions

Select from:

No change

#### (7.10.1.3) Emissions value (percentage)

0

#### (7.10.1.4) Please explain calculation

*No unidentified changes.*

### Other

#### (7.10.1.1) Change in emissions (metric tons CO2e)

5643.48

#### (7.10.1.2) Direction of change in emissions

Select from:

Increased

#### (7.10.1.3) Emissions value (percentage)

**(7.10.1.4) Please explain calculation**

*This item is for the gasoline and diesel fuel used by the global sales and service fleet vehicles. Fuel usage increased for 2024 vs 2023. Emissions calculated based on fuel consumed and associated GHG emissions factors. This item also includes the reductions from the closure and dismantling of two small factories.*

*[Fixed row]*

**(7.10.2) Are your emissions performance calculations in 7.10 and 7.10.1 based on a location-based Scope 2 emissions figure or a market-based Scope 2 emissions figure?**

Select from:

Market-based

**(7.11) How do your total Scope 3 emissions for the reporting year compare to those of the previous reporting year?**

Select from:

Decreased

**(7.11.1) For each Scope 3 category calculated in 7.8, specify how your emissions compare to the previous year and identify the reason for any change.****Purchased goods and services****(7.11.1.1) Direction of change**

Select from:

Decreased

**(7.11.1.2) Primary reason for change**

Select from:

Change in material efficiency

### (7.11.1.3) Change in emissions in this category (metric tons CO2e)

908538

### (7.11.1.4) % change in emissions in this category

20

### (7.11.1.5) Please explain

*We currently use a hybrid approach of spend-based and weight-based method for category 1, we intend to use a more supplier-specific approach in the coming years which will provide more clarity around reason of change.*

## Use of sold products

### (7.11.1.1) Direction of change

Select from:

Decreased

### (7.11.1.2) Primary reason for change

Select from:

Change in product efficiency

### (7.11.1.3) Change in emissions in this category (metric tons CO2e)

32000000

### (7.11.1.4) % change in emissions in this category

12

### (7.11.1.5) Please explain

The Gigaton Challenge is the first-of-its-kind climate commitment related to customer product use of any business-to-business company. It guides our mission to change the way the world heats and cools buildings and moves refrigerated cargo. To achieve our Gigaton Challenge, we are taking action to reduce our customer carbon emissions from the use of our products and services from a 2019 baseline through 2030. Two levers that aided in this emission reduction were high efficiency equipment sales and sales of equipment with lower GWP.

[Fixed row]

### **(7.12) Are carbon dioxide emissions from biogenic carbon relevant to your organization?**

Select from:

No

### **(7.15) Does your organization break down its Scope 1 emissions by greenhouse gas type?**

Select from:

No

### **(7.16) Break down your total gross global Scope 1 and 2 emissions by country/area.**

0

**(7.22.4) Please explain**

*No other entities.*

*[Fixed row]*

**(7.23) Is your organization able to break down your emissions data for any of the subsidiaries included in your CDP response?**

*Select from:*

No

**(7.27) What are the challenges in allocating emissions to different customers, and what would help you to overcome these challenges?**

## Row 1

### (7.27.1) Allocation challenges

Select from:

Customer base is too large and diverse to accurately track emissions to the customer level

[Add row]

### (7.28) Do you plan to develop your capabilities to allocate emissions to your customers in the future?

	Do you plan to develop your capabilities to allocate emissions to your customers in the future?	Describe how you plan to develop your capabilities
	Select from: <input checked="" type="checkbox"/> Yes	Our LCA and EPD strategy will enable us to better allocate emissions to the customer level.

[Fixed row]

### (7.29) What percentage of your total operational spend in the reporting year was on energy?

Select from:

More than 0% but less than or equal to 5%

### (7.30) Select which energy-related activities your organization has undertaken.

	Indicate whether your organization undertook this energy-related activity in the reporting year
Consumption of fuel (excluding feedstocks)	Select from: <input checked="" type="checkbox"/> Yes
Consumption of purchased or acquired electricity	Select from: <input checked="" type="checkbox"/> Yes
Consumption of purchased or acquired heat	Select from: <input checked="" type="checkbox"/> No
Consumption of purchased or acquired steam	Select from: <input checked="" type="checkbox"/> No
Consumption of purchased or acquired cooling	Select from: <input checked="" type="checkbox"/> No
Generation of electricity, heat, steam, or cooling	Select from: <input checked="" type="checkbox"/> Yes

[Fixed row]

### (7.30.1) Report your organization's energy consumption totals (excluding feedstocks) in MWh.

#### Consumption of fuel (excluding feedstock)

##### (7.30.1.1) Heating value

Select from:

HHV (higher heating value)

##### (7.30.1.2) MWh from renewable sources

577.28

### (7.30.1.3) MWh from non-renewable sources

525275.59

### (7.30.1.4) Total (renewable + non-renewable) MWh

525852.87

## Consumption of purchased or acquired electricity

### (7.30.1.1) Heating value

Select from:

HHV (higher heating value)

### (7.30.1.2) MWh from renewable sources

219544.93

### (7.30.1.3) MWh from non-renewable sources

92936.63

### (7.30.1.4) Total (renewable + non-renewable) MWh

312481.56

## Consumption of self-generated non-fuel renewable energy

### (7.30.1.1) Heating value

Select from:

HHV (higher heating value)

### (7.30.1.2) MWh from renewable sources

10083.49

### (7.30.1.4) Total (renewable + non-renewable) MWh

10083.49

## Total energy consumption

### (7.30.1.1) Heating value

Select from:

HHV (higher heating value)

### (7.30.1.2) MWh from renewable sources

230205.7

### (7.30.1.3) MWh from non-renewable sources

618212.21

### (7.30.1.4) Total (renewable + non-renewable) MWh

848417.91

[Fixed row]

## (7.30.6) Select the applications of your organization's consumption of fuel.

	Indicate whether your organization undertakes this fuel application
Consumption of fuel for the generation of electricity	Select from: <input checked="" type="checkbox"/> No
Consumption of fuel for the generation of heat	Select from: <input checked="" type="checkbox"/> Yes
Consumption of fuel for the generation of steam	Select from: <input checked="" type="checkbox"/> No
Consumption of fuel for the generation of cooling	Select from: <input checked="" type="checkbox"/> No
Consumption of fuel for co-generation or tri-generation	Select from: <input checked="" type="checkbox"/> No

[Fixed row]

**(7.30.7) State how much fuel in MWh your organization has consumed (excluding feedstocks) by fuel type.**

### Sustainable biomass

#### (7.30.7.1) Heating value

Select from:

HHV

#### (7.30.7.2) Total fuel MWh consumed by the organization

577.28

#### (7.30.7.8) Comment

Consumption of biodiesel, biopropane, and vegetable oil.

## Other biomass

### (7.30.7.1) Heating value

Select from:

HHV

### (7.30.7.2) Total fuel MWh consumed by the organization

0

### (7.30.7.8) Comment

None.

## Other renewable fuels (e.g. renewable hydrogen)

### (7.30.7.1) Heating value

Select from:

HHV

### (7.30.7.2) Total fuel MWh consumed by the organization

0

### (7.30.7.8) Comment

None

## Coal

### (7.30.7.1) Heating value

Select from:

HHV

**(7.30.7.2) Total fuel MWh consumed by the organization**

0

**(7.30.7.8) Comment**

None

**Oil**

**(7.30.7.1) Heating value**

Select from:

HHV

361903.15

### (7.30.16.7) Provide details of the electricity consumption excluded

None excluded.

[Fixed row]

### (7.30.17) Provide details of your organization's renewable electricity purchases in the reporting year by country/area.

## Row 1

### (7.30.17.1) Country/area of consumption of purchased renewable electricity

Select from:

China

### (7.30.17.2) Sourcing method

Select from:

Retail supply contract with an electricity supplier (retail green electricity)

### (7.30.17.3) Renewable electricity technology type

Select from:

Renewable electricity mix, please specify :Mixed

### (7.30.17.4) Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

6677.55

### (7.30.17.5) Tracking instrument used

Select from:

Contract

### (7.30.17.6) Country/area of origin (generation) of purchased renewable electricity

Select from:

China

### (7.30.17.7) Are you able to report the commissioning or re-powering year of the energy generation facility?

Select from:

No

### (7.30.17.9) Vintage of the renewable energy/attribute (i.e. year of generation)

Select from:

2024

### (7.30.17.10) Supply arrangement start year

2020

### (7.30.17.11) Ecolabel associated with purchased renewable electricity

Select from:

No additional, voluntary label

### (7.30.17.12) Comment

*Supply arrangement with local power companies.*

## Row 2

### (7.30.17.1) Country/area of consumption of purchased renewable electricity

Select from:

Czechia

### (7.30.17.2) Sourcing method

Select from:

Unbundled procurement of Energy Attribute Certificates (EACs)

### (7.30.17.3) Renewable electricity technology type

Select from:

Renewable electricity mix, please specify :Mixed generation.

**(7.30.17.4) Renewable electricity consumed via selected sourcing method in the reporting year (MWh)**

3339.09

**(7.30.17.5) Tracking instrument used**

Select from:

Contract

**(7.30.17.6) Country/area of origin (generation) of purchased renewable electricity**

Select from:

Czechia

**(7.30.17.7) Are you able to report the commissioning or re-powering year of the energy generation facility?**

Select from:

Yes

**(7.30.17.8) Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)**

2021

**(7.30.17.9) Vintage of the renewable energy/attribute (i.e. year of generation)**

Select from:

2024

**(7.30.17.10) Supply arrangement start year**

2020

**(7.30.17.11) Ecolabel associated with purchased renewable electricity**

Select from:

Green-e Certified(R) Renewable Energy

### (7.30.17.12) Comment

*Guarantees of Origin associated with wind related renewable energy*

### Row 3

### (7.30.17.1) Country/area of consumption of purchased renewable electricity

*Select from:*

Germany

### (7.30.17.2) Sourcing method

*Select from:*

Retail supply contract with an electricity supplier (retail green electricity)

### (7.30.17.3) Renewable electricity technology type

*Select from:*

Renewable electricity mix, please specify :Mixed generation.

### (7.30.17.4) Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

722.38

### (7.30.17.5) Tracking instrument used

*Select from:*

Contract

### (7.30.17.6) Country/area of origin (generation) of purchased renewable electricity

*Select from:*

Germany

**(7.30.17.7) Are you able to report the commissioning or re-powering year of the energy generation facility?**

Select from:

No

**(7.30.17.9) Vintage of the renewable energy/attribute (i.e. year of generation)**

Select from:

2024

**(7.30.17.10) Supply arrangement start year**

2020

**(7.30.17.11) Ecolabel associated with purchased renewable electricity**

Select from:

Green-e Certified(R) Renewable Energy

**(7.30.17.12) Comment**

*Supply arrangement with local power companies.*

**Row 4**

**(7.30.17.1) Country/area of consumption of purchased renewable electricity**

Select from:

Italy

**(7.30.17.2) Sourcing method**

Select from:

Retail supply contract with an electricity supplier (retail green electricity)

### (7.30.17.3) Renewable electricity technology type

Select from:

Wind

### (7.30.17.4) Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

874.45

### (7.30.17.5) Tracking instrument used

Select from:

Contract

### (7.30.17.6) Country/area of origin (generation) of purchased renewable electricity

Select from:

Italy

### (7.30.17.7) Are you able to report the commissioning or re-powering year of the energy generation facility?

Select from:

No

### (7.30.17.9) Vintage of the renewable energy/attribute (i.e. year of generation)

Select from:

2024

### (7.30.17.10) Supply arrangement start year

2020

### (7.30.17.11) Ecolabel associated with purchased renewable electricity

Select from:

- Green-e Certified(R) Renewable Energy

### (7.30.17.12) Comment

*Supply arrangement with local power companies.*

## Row 5

### (7.30.17.1) Country/area of consumption of purchased renewable electricity

Select from:

- Ireland

### (7.30.17.2) Sourcing method

Select from:

- Retail supply contract with an electricity supplier (retail green electricity)

### (7.30.17.3) Renewable electricity technology type

Select from:

- Renewable electricity mix, please specify :Mixed Generation

### (7.30.17.4) Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

3276.44

### (7.30.17.5) Tracking instrument used

Select from:

- Contract

**(7.30.17.6) Country/area of origin (generation) of purchased renewable electricity**

Select from:

Ireland

**(7.30.17.7) Are you able to report the commissioning or re-powering year of the energy generation facility?**

Select from:

Yes

**(7.30.17.8) Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)**

2022

**(7.30.17.9) Vintage of the renewable energy/attribute (i.e. year of generation)**

Select from:

2024

**(7.30.17.10) Supply arrangement start year**

2020

**(7.30.17.11) Ecolabel associated with purchased renewable electricity**

Select from:

Green-e Certified(R) Renewable Energy

**(7.30.17.12) Comment**

*Energy supplier indicates a mix of 100% renewable generation activities that varies by month and year.*

**Row 6**

**(7.30.17.1) Country/area of consumption of purchased renewable electricity**

Select from:

Mexico

### (7.30.17.2) Sourcing method

Select from:

Retail supply contract with an electricity supplier (retail green electricity)

### (7.30.17.3) Renewable electricity technology type

Select from:

Solar

### (7.30.17.4) Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

14545.48

### (7.30.17.5) Tracking instrument used

Select from:

Contract

### (7.30.17.6) Country/area of origin (generation) of purchased renewable electricity

Select from:

Mexico

### (7.30.17.7) Are you able to report the commissioning or re-powering year of the energy generation facility?

Select from:

No

### (7.30.17.9) Vintage of the renewable energy/attribute (i.e. year of generation)

Select from:

2024

### (7.30.17.10) Supply arrangement start year

2022

### (7.30.17.11) Ecolabel associated with purchased renewable electricity

Select from:

Green-e Certified(R) Renewable Energy

### (7.30.17.12) Comment

*Power company indicates a mix of 100% renewable generation for the electricity provided*

## Row 7

### (7.30.17.1) Country/area of consumption of purchased renewable electricity

Select from:

Spain

### (7.30.17.2) Sourcing method

Select from:

Unbundled procurement of Energy Attribute Certificates (EACs)

### (7.30.17.3) Renewable electricity technology type

Select from:

Renewable electricity mix, please specify :Mixed generation.

### (7.30.17.4) Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

*Onsite solar generation system.*

*[Add row]*

**(7.30.20) Describe how your organization's renewable electricity sourcing strategy directly or indirectly contributes to bringing new capacity into the grid in the countries/areas in which you operate.**

*Our renewable electricity sourcing strategy includes a combination of on-site and off-site projects. At select company sites where site conditions have been deemed appropriate, Trane Technologies has installed on-site solar photovoltaic projects that reduce our dependence on traditional grid-electricity. Additionally, in 2017 we*

*entered into a power purchase agreement with a renewable energy developer that enabled the construction of a large scale off-site wind energy project, which began operations in 2019, that materially reduces our Scope 2 electricity-related emissions. We continue to evaluate additional opportunities for both on-site and off-site renewable energy projects and will continue to advance our electricity sourcing strategy in a manner that will continue to enable new renewable energy capacity to be deployed onto the electricity grid. During 2022, we partnered with renewable energy developers in China to purchase significant quantities of green electricity for two key factories. In addition, Trane Technologies has contracts in place for key locations to directly receive electricity generated by 3rd parties using 100% renewable systems. We signed on to a new 5-year green electricity supply agreement in late 2024 to cover 100% of electricity required for our largest USA usage location. Where reasonable, we are paying the higher price per KWhr to acquire the zero-carbon electricity. This supports further greening of the power grid in locations where we operate.*

### **(7.30.21) In the reporting year, has your organization faced barriers or challenges to sourcing renewable electricity?**

#### **(7.30.21.1) Challenges to sourcing renewable electricity**

Select from:

Yes, not specific to a country/area

#### **(7.30.21.2) Challenges faced by your organization which were not country/area-specific**

*Trane Technologies has observed higher prices to invest in renewable energy partnerships, along with projects snapped up by organizations who are buying into much larger projects and contacts. Further challenges is the potential for changes in the regulatory landscape that can restrict utilization of renewable energy within smaller regional networks.*

*[Fixed row]*

### **(7.34) Does your organization measure the efficiency of any of its products or services?**

#### **(7.34.1) Measurement of product/service efficiency**

Select from:

Yes

#### **(7.34.2) Comment**

The majority of the carbon footprint of our products is from the use of energy, specifically, electricity. Emissions from refrigerants are approximately 10% of the total carbon footprint. We are addressing efficiency with a target of reducing our customers' emissions by 1 billion metric tons CO2e by 2030. We have tracked product-use emissions reductions from energy and refrigerants against our 2020 commitment and will continue to do so through 2030. In the future, while we continue our transition away from high GWP refrigerants by 2030. We will also focus on helping customers reduce their emissions. A portfolio with world-class energy efficiency products will help us do that.

[Fixed row]

### **(7.34.1) Provide details of the metrics used to measure the efficiency of your organization's products or services.**

#### **Row 1**

##### **(7.34.1.1) Category of product or service**

Select from:

Heating & cooling systems

##### **(7.34.1.2) Product or service (optional)**

Heating & cooling systems rated above min standard efficiency with next generation, low GWP refrigerant: Residential air conditioning units are rated according to their seasonal energy efficiency ratio (SEER). SEER indicates the relative amount of energy needed to provide a specific cooling output. Commercial systems are rated according to ASHRAE 90.1 standards. Transport Refrigeration Systems with higher efficiency & next gen refrigerant.

##### **(7.34.1.3) % of revenue from this product or service in the reporting year**

### (7.54.3.9) Greenhouse gases covered by target

Select all that apply

- Carbon dioxide (CO2)

### (7.54.3.10) Explain target coverage and identify any exclusions

*This target includes our full Scope 1 and 2 emissions, no exclusions. This target also includes Scope 3 emissions from category 11, use of sold products, which includes over 98% of our Scope 3 emissions.*

### (7.54.3.11) Target objective

*In 2022, we demonstrated our bold ambitions by becoming the first in our industry — and one of the first companies across all sectors — to set a long term net-zero target approved by the Science Based Targets initiative (SBTi). Our science-based targets align with the Paris Agreement's net-zero targets, which limit global temperature rise to no more than 1.5°C. Our near-term science-based targets for Scope 1, 2 and 3 guide our emissions reduction efforts through 2030. As we take steps to meet our near-term goals, we also work toward achieving our long-term goal of net-zero emissions by 2050.*

### (7.54.3.12) Do you intend to neutralize any residual emissions with permanent carbon removals at the end of the target?

Select from:

- Yes

### (7.54.3.13) Do you plan to mitigate emissions beyond your value chain?

Select from:

- No, but we plan to within the next two years

### (7.54.3.14) Do you intend to purchase and cancel carbon credits for neutralization and/or beyond value chain mitigation?

Select all that apply

- Yes, we plan to purchase and cancel carbon credits for beyond value chain mitigation

### **(7.54.3.15) Planned milestones and/or near-term investments for neutralization at the end of the target**

*We will continue to explore approaches that align with our Climate Transition Plan to neutralize residual emissions in order to achieve our target.*

### **(7.54.3.17) Target status in reporting year**

Select from:

- Underway

### **(7.54.3.19) Process for reviewing target**

*We plan to update our Climate Transition Plan when there are significant operational or market changes or, at the latest, every three years in alignment with the TPT Disclosure Framework's recommended publication cycle. We will disclose our progress in implementing the CTP in our annual Sustainability Report. Each year, we will share key climate change mitigation and decarbonization actions taken, progress on our climate targets and metrics and updates on new decarbonization initiatives and low-carbon products.*

*[Add row]*

**(7.55) Did you have emissions reduction initiatives that were active within the reporting year? Note that this can include those in the planning and/or implementation phases.**

Select from:

- Yes

### (7.55.2.9) Comment

*Shift to alternate refrigerants*  
*[Add row]*

## (7.55.3) What methods do you use to drive investment in emissions reduction activities?

### Row 1

#### (7.55.3.1) Method

Select from:

- Compliance with regulatory requirements/standards

#### (7.55.3.2) Comment

*Our corporate Environment, Health and Safety Management Systems (EMS) requirements apply to all majority-owned operations worldwide. Our internal EMS is posted to the Company's Business Operating System (BOS) platform which governs and standardizes how all functions within the Company operate. The basis of our EMS is derived from our existing corporate operational excellence program and applies the same principles to EHS by incorporating tools that have already proven successful. Within our EMS also sits our Environment, Health and Safety policy, which has been signed by our Chair and CEO.*

### Row 2

#### (7.55.3.1) Method

Select from:

- Internal incentives/recognition programs

#### (7.55.3.2) Comment

*Challenge Possible Awards recognize achievements in areas that support Trane Technologies' goals including energy efficiency and greenhouse gas emission reductions. To more closely align the annual short-term incentive compensation of our leaders to the value that we, as a Company, place on environmental sustainability and employee diversity and inclusion, we utilize a Sustainability modifier as a component of Trane Technologies' annual incentive program (AIM).*

### Row 3

### (7.55.3.1) Method

Select from:

- Partnering with governments on technology development

### (7.55.3.2) Comment

*We are engaged with policymakers to bring solutions to topics that are material to our business, with two areas where the company is most active including energy and refrigerant policy. Trane Technologies supports cost-effective policies that facilitate market transition to more energy-efficient, climate friendly technologies. We actively participate in international forums, such as the United Nations Framework Convention on Climate Change and the Montreal Protocol, to help create an organized approach to global refrigerant transitions without compromising on energy efficiency. We are also working proactively with government agencies and refrigerant suppliers to help identify alternatives and facilitate a practical transition that reduces greenhouse gas emissions as early as possible.*

[Add row]

## (7.71) Does your organization assess the life cycle emissions of any of its products or services?

### (7.71.1) Assessment of life cycle emissions

Select from:

- Yes

### (7.71.2) Comment

*We continue to advance our pursuit and publication of LCAs and EPDs to meet customer demand for transparency into the sustainability of our products. Customers reference our LCAs and EPDs for various uses, including making informed decisions on the most sustainable products or materials for their projects, contributing to whole-project LCAs (e.g., whole building LCAs) and performing their own corporate carbon footprint calculations.*

[Fixed row]

## (7.71.1) Provide details of how your organization assesses the life cycle emissions of its products or services.

### (7.71.1.1) Products/services assessed

Select from:

- All existing and new products/services

### (7.71.1.2) Life cycle stage(s) most commonly covered

Select from:

- Use stage

### (7.71.1.3) Methodologies/standards/tools applied

Select all that apply

- GHG Protocol Product Accounting & Reporting Standard

### (7.71.1.4) Comment

*The majority of the carbon footprint of our products is from the use of energy, specifically, electricity. Emissions from refrigerants are approximately 10% of the total carbon footprint. We are addressing efficiency with a target of reducing our customers' emissions by 1 billion metric tons CO2e from business as usual by 2030. We have tracked product-use emissions reductions from energy and refrigerants since our 2020 commitment and will continue to do so through 2030. In the future, while we will continue our complete transition out of high GWP refrigerants by 2030. We will also focus on helping customers reduce their emissions. A portfolio with world-class energy efficiency products will help us do that.*

[Fixed row]

### (7.73) Are you providing product level data for your organization's goods or services?

Select from:

- No, I am not providing data

### (7.74) Do you classify any of your existing goods and/or services as low-carbon products?

Select from:

- Yes

### (7.74.1) Provide details of your products and/or services that you classify as low-carbon products.

Row 1

### (7.74.1.1) Level of aggregation

Select from:

- Group of products or services

### (7.74.1.2) Taxonomy used to classify product(s) or service(s) as low-carbon

Select from:

- The IEA Energy Technology Perspectives Clean Energy Technology Guide

### (7.74.1.3) Type of product(s) or service(s)

Heating and cooling

- Other, please specify :Sustainable Product Offerings

### (7.74.1.4) Description of product(s) or service(s)

*We provide industry-leading technology and product innovations in electrification, energy efficiency, digital services and autonomous controls and the use of low-global warming potential (GWP) refrigerants.*

### (7.74.1.5) Have you estimated the avoided emissions of this low-carbon product(s) or service(s)

Select from:

- No

### (7.74.1.13) Revenue generated from low-carbon product(s) or service(s) as % of total revenue in the reporting year

46

[Add row]

### (7.79) Has your organization retired any project-based carbon credits within the reporting year?

Select from:

No

## C9. Environmental performance - Water security

### (9.1) Are there any exclusions from your disclosure of water-related data?

Select from:

No

### (9.2) Across all your operations, what proportion of the following water aspects are regularly measured and monitored?

#### Water withdrawals – total volumes

##### (9.2.1) % of sites/facilities/operations

Select from:

100%

##### (9.2.2) Frequency of measurement

Select from:

Monthly

##### (9.2.3) Method of measurement

*Water withdrawals are measured by incoming water meters.*

##### (9.2.4) Please explain

*Trane Technologies considers water quality for both intake and discharge an important issue at our sites. We track monthly water usage at the facility level utilizing water meters for incoming water to our facilities. We house the water usage data in our environmental data reporting platform (Benchmark ESGTM). We have established annual targets to reduce water use at our sites, and a 2030 goal to become "Net Positive" for water use at our water stressed locales. Water withdrawal volumes are obtained from flow meters for the site-specific source/supplier with reports provided either daily or monthly.*

#### Water withdrawals – volumes by source

### (9.2.1) % of sites/facilities/operations

Select from:

100%

### (9.2.2) Frequency of measurement

Select from:

Monthly

### (9.2.3) Method of measurement

*Water withdrawals are measured by incoming water meters.*

### (9.2.4) Please explain

*Trane Technologies considers water quality for both intake and discharge an important issue at our sites. We track monthly water usage at the facility level utilizing water meters for incoming water to our facilities. We house the water usage data in our environmental data reporting platform (Benchmark Gensuite™). We have annual targets to reduce water use at our sites, and a 2030 goal to become "Net Positive" for water use at our water stressed locales. Water withdrawal volumes are obtained from flow meters for the site-specific source/supplier with reports provided either daily or monthly.*

## Water withdrawals quality

### (9.2.1) % of sites/facilities/operations

Select from:

Not relevant

### (9.2.4) Please explain

*Trane Technologies facilities comply with all applicable federal, state, provisional, and local water quality regulations and permits/licenses regarding water withdrawals and wastewater discharges. Water Withdrawals Quality is not relevant for Trane Technologies, and we do not expect this water aspect to be relevant in the future, given routine water withdrawals are received from local water suppliers who manage and treat community water provided to all customers to potable water quality standards per local regulations. As such Trane Technologies does not routinely monitor the quality of incoming water. Trane Technologies maintains awareness of potential impacts to the quality of locally supplied water and will consider monitoring of incoming water quality if water quality is at risk due to global climate change or other factors.*

## Water discharges – total volumes

### (9.2.1) % of sites/facilities/operations

Select from:

100%

### (9.2.2) Frequency of measurement

Select from:

Other, please specify :Discharge measurement monitoring varies by location based on the frequency of water discharged. Some locations monitor continuously while other locations monitoring on a batch discharge basis.

### (9.2.3) Method of measurement

*Discharge measurement monitoring varies by location based on the frequency of water discharged. Some locations monitor continuously while other locations monitoring on a batch discharge basis.*

### (9.2.4) Please explain

*Trane Technologies considers water quality for both intake and discharge as an important issue at all of our sites. Our manufacturing facilities track their water discharges. We consolidate/report internal water usage and discharges at the facility level on a monthly basis using our environmental data management platform (Benchmark ESGTM). The system's Water Watch module also tracks compliance with environmental permits related to our water discharge limits. We take aggressive action when approaching a discharge limit to adjust systems to avoid an exceedance. We set an internal limit to be below 50% of our permit level at our facilities globally. Our process discharge waters are first internally treated and then discharged onto the community water treatment systems with the final water released back to the environment at the same or higher quality as the withdrawn water*

## Water discharges – volumes by destination

### (9.2.1) % of sites/facilities/operations

Select from:

100%

### (9.2.2) Frequency of measurement

Select from:

Other, please specify :Discharge measurement monitoring varies by location based on the frequency of water discharged. Some locations monitor continuously while other locations monitoring on a batch discharge basis.

### (9.2.3) Method of measurement

*Discharge measurement monitoring varies by location based on the frequency of water discharged. Some locations monitor continuously while other locations monitoring on a batch discharge basis.*

### (9.2.4) Please explain

*Trane Technologies considers water quality for both intake and discharge as an important issue at all of our sites. Our manufacturing facilities track their water discharges. Our process discharge waters are first internally treated and then discharged onto the community water treatment systems with the final water released back to the environment at the same or higher quality as the withdrawn water.*

*[Fixed row]*

**(9.2.2) What are the total volumes of water withdrawn, discharged, and consumed across all your operations, how do they compare to the previous reporting year, and how are they forecasted to change?**

### **Total withdrawals**

#### **(9.2.2.1) Volume (megaliters/year)**

1514

#### **(9.2.2.2) Comparison with previous reporting year**

Select from:

Much lower

#### **(9.2.2.3) Primary reason for comparison with previous reporting year**

Select from:

Investment in water-smart technology/process

#### **(9.2.2.4) Five-year forecast**

Select from:

Lower

#### **(9.2.2.5) Primary reason for forecast**

Select from:

Increase/decrease in efficiency

### (9.2.2.6) Please explain

*Approximately 75% of water withdrawn is used for non-contact manufacturing purposes. Such water is withdrawn and return to the water authorities free of contamination from Trane Technologies business activities. The 2024 water withdrawals is 23% lower vs 2023. When comparing 2024 water withdrawals against 2019, Trane Technologies water withdrawals is down by 49%. Trane Technologies commits to a 2030 goal to become "Net Positive" for water use at our water stressed sites.*

## Total discharges

### (9.2.2.1) Volume (megaliters/year)

1514

### (9.2.2.2) Comparison with previous reporting year

Select from:

Much lower

### (9.2.2.3) Primary reason for comparison with previous reporting year

Select from:

Investment in water-smart technology/process

### (9.2.2.4) Five-year forecast

Select from:

Lower

### (9.2.2.5) Primary reason for forecast

Select from:

Increase/decrease in efficiency

### (9.2.2.6) Please explain

Trane Technologies discharged approximately 10% of total water withdrawn (170 megaliters) as pre-treated process wastewater with this effluent directed to third-party/ community wastewater treatment facilities. The balance of the discharged water (~1,340 megaliters) is non-contact water with a small portion discharged as sanitary wastewater directed to community wastewater treatment facilities.

## Total consumption

0

### (9.2.2.2) Comparison with previous reporting year

Select from:

About the same

### (9.2.2.3) Primary reason for comparison with previous reporting year

Select from:

Investment in water-smart technology/process

### (9.2.2.4) Five-year forecast

Select from:

About the same

### (9.2.2.5) Primary reason for forecast

Select from:

Increase/decrease in efficiency

### (9.2.2.6) Please explain

Trane Technologies' sites in general return the water received from local suppliers. Our consumption is based on a company-wide calculation of withdrawals minus discharges. Our operations are not significant water consumers and do not generally experience any material evaporative or other water losses. Our total consumption will decrease in the future between 5 and 10 percent based on the reduction in water withdrawn in stressed water regions combined with the

implementation of closed-loop process water systems. Trane Technologies does not incorporate water into wastes, crops, or products. We do not store water for controlled or future uses.

[Fixed row]

**(9.2.4) Indicate whether water is withdrawn from areas with water stress, provide the volume, how it compares with the previous reporting year, and how it is forecasted to change.**

**(9.2.4.1) Withdrawals are from areas with water stress**

Select from:

Yes

**(9.2.4.2) Volume withdrawn from areas with water stress (megaliters)**

225.51

**(9.2.4.3) Comparison with previous reporting year**

WRI Aqueduct

#### (9.2.4.9) Please explain

*For reporting year 2025, additional Trane Technologies sites will be reclassified as located in water stressed locales vs the group reported for 2024. This will increase the water usage in stressed locales.*

*[Fixed row]*

### (9.2.7) Provide total water withdrawal data by source.

#### Fresh surface water, including rainwater, water from wetlands, rivers, and lakes

##### (9.2.7.1) Relevance

Select from:

Not relevant

##### (9.2.7.5) Please explain

*Our Monterrey, Mexico manufacturing site began capturing rainwater for onsite use. Monterrey's total water usage accounts for less than 1 percent of total company water withdrawals which is considered negligible and therefore not relevant. No other locations are directly consuming freshwater or harvesting rainwater.*

#### Brackish surface water/Seawater

### (9.2.7.1) Relevance

Select from:

Not relevant

### (9.2.7.5) Please explain

*Trane Technologies does not withdraw seawater or brackish surface water.*

## Groundwater – renewable

### (9.2.7.1) Relevance

Select from:

Not relevant

### (9.2.7.5) Please explain

*A small number of Trane Technologies locations have onsite wells to serve as a backup water supply. Water is not routinely drawn from these wells. On a worse case basis, water from these wells would account to less than 1% (entire source) vs our total water withdrawals, which is negligible and therefore not relevant.*

## Groundwater – non-renewable

### (9.2.7.1) Relevance

Select from:

Not relevant

### (9.2.7.5) Please explain

*Trane Technologies locations do not withdrawal groundwater from non-renewable sources. This question is not relevant to our water consumption.*

## Produced/Entrained water

### (9.2.7.1) Relevance

Select from:

Not relevant

### (9.2.7.5) Please explain

*Our business operations do not produce water, nor do our products or processes entrain water. This water source is not applicable to Trane Technologies.*

### (9.2.8.2) Volume (megaliters/year)

1514

### (9.2.8.3) Comparison with previous reporting year

Select from:

Lower

### (9.2.8.4) Primary reason for comparison with previous reporting year

Select from:

Increase/decrease in efficiency

### (9.2.8.5) Please explain

*Trane Technologies inadvertently reported for the CY2023 report the amount of water used at our stressed locations that is discharged to a third party. The total 2023 discharge is 1,970.33 megaliters. Our 2024 total discharge volume is down 23% vs 2023. We have realized a significant reduction by upgrading HVAC water cooled systems that used once through water.*

*[Fixed row]*

## (9.2.9) Within your direct operations, indicate the highest level(s) to which you treat your discharge.

### Tertiary treatment

#### (9.2.9.1) Relevance of treatment level to discharge

Select from:

Relevant

### (9.2.9.2) Volume (megaliters/year)

163.31

### (9.2.9.3) Comparison of treated volume with previous reporting year

Select from:

Higher

### (9.2.9.4) Primary reason for comparison with previous reporting year

Select from:

Increase/decrease in business activity

### (9.2.9.5) % of your sites/facilities/operations this volume applies to

Select from:

31-40

### (9.2.9.6) Please explain

*A number of Trane Technologies' manufacturing locations phosphatize metal substrates prior to surface coating. Process wastewater is collected and treated using multi-stage operations to remove solids, metals, and other regulated parameters. The treatment standards are defined by a combination of federal and local regulatory standards. The pre-treated water is discharged to the community wastewater treatment system.*

## Secondary treatment

### (9.2.9.1) Relevance of treatment level to discharge

Select from:

Relevant

### (9.2.9.2) Volume (megaliters/year)

4.21

### (9.2.9.3) Comparison of treated volume with previous reporting year

Lower

### (9.2.9.4) Primary reason for comparison with previous reporting year

Select from:

Increase/decrease in business activity

### (9.2.9.5) % of your sites/facilities/operations this volume applies to

Select from:

11-20

### (9.2.9.6) Please explain

*Trane Technologies also utilizes pre-treatment systems to remove organics or other general solids to meet regulatory standards. These permitted units discharge the treated water onto the community wastewater treatment systems. Our secondary treatment systems are required per local regulations and our designed to ensure water is continuously pre-treated to the applicable regulatory standards.*

### Primary treatment only

### (9.2.9.1) Relevance of treatment level to discharge

Select from:

Not relevant

### (9.2.9.6) Please explain

Trane Technologies also treats very small quantities of plant wastewater using simple oil/water type systems prior to the water release to the community wastewater treatment system. This pretreatment is completed to meet general discharge standards under local/city ordinances. This level of treatment is prescribed per local water ordinance. Trane Technologies operated during 2024 with full compliance of these local requirements (regulatory standards).

## Discharge to the natural environment without treatment

### (9.2.9.1) Relevance of treatment level to discharge

Select from:

Not relevant

### (9.2.9.6) Please explain

Trane Technologies does not discharge water to the natural environment.

## Discharge to a third party without treatment

### (9.2.9.1) Relevance of treatment level to discharge

Select from:

Relevant

### (9.2.9.2) Volume (megaliters/year)

1273.19

### (9.2.9.3) Comparison of treated volume with previous reporting year

About the same

### (9.2.9.4) Primary reason for comparison with previous reporting year

Select from:

Increase/decrease in business activity

### (9.2.9.5) % of your sites/facilities/operations this volume applies to

Select from:

51-60

### (9.2.9.6) Please explain

*Only a small portion of water used by Trane Technologies requires treatment with regard to regulatory standards. During 2024, 92% of water withdrawn is used for non-industrial purposes and is discharged to a third party without treatment.*

### Other

### (9.2.9.1) Relevance of treatment level to discharge

Select from:

Not relevant

### (9.2.9.6) Please explain

*We have no other form of treatment  
[Fixed row]*

**(9.2.10) Provide details of your organization's emissions of nitrates, phosphates, pesticides, and other priority substances to water in the reporting year.**

### (9.2.10.1) Emissions to water in the reporting year (metric tons)

1.9

### (9.2.10.2) Categories of substances included

Select all that apply

- Nitrates
- Phosphates
- Priority substances listed under the EU Water Framework Directive

### (9.2.10.3) List the specific substances included

*Trane Technologies locations with tertiary pre- treatment systems are limited or potentially on discharges of nitrates/nitrogen species, phosphates/phosphorous compounds, Cadmium, Lead, and polyaromatic hydrocarbons.*

### (9.2.10.4) Please explain

*The total mass of materials discharged is calculated using the tertiary wastewater discharge volumes and the associated discharge concentration of the substances described. The general calculation for mass discharged is Mass per Year Annual Discharge Volume (liters/year) X Species Discharge Concentration (mg/L). The individual masses for each species are summed to estimate the total mass discharged. Milligrams are converted to metric tons by dividing by 1,000,000,000. [Fixed row]*

## (9.3) In your direct operations and upstream value chain, what is the number of facilities where you have identified substantive water-related dependencies, impacts, risks, and opportunities?

### Direct operations

#### (9.3.1) Identification of facilities in the value chain stage

Select from:

- No, we have not assessed this value chain stage for facilities with water-related dependencies, impacts, risks, and opportunities, but we are planning to do so in the next 2 years

#### (9.3.4) Please explain

*Trane Technologies processes and products are not water intensive. For example, our products are heavy users of energy sources and refrigerants therefore we have dedicated risk mitigation focused on that, but majority of our products do not require water to operate. Water is necessary for staff consumption as well as used for parts washing and product testing at some of our manufacturing operations. All Trane Technologies manufacturing sites are required to implement an Environmental Health and Safety Management System (EMS) and identify their aspects and impacts of their operations. The impact of our operations on water*

quantity and quality is one potential impact that is evaluated during this process. Water quantity and quality concerns are managed on an individual facility basis through the use of the site's EMS.

## Upstream value chain

### (9.3.1) Identification of facilities in the value chain stage

Select from:

No, we have assessed this value chain stage but did not identify any facilities with water-related dependencies, impacts, risks, and opportunities

### (9.3.4) Please explain

*While risks are present, recent interactions with suppliers suggest the water risks do not present a significant likelihood of an adverse impact on their operations. We requested suppliers to disclose if they were located in water-stressed regions and found that a vast majority of our supply base is not. In most cases, Trane Technologies' preferred suppliers have developed and implemented sustainability programs that include aspects for water supplies and quality necessary for their business needs.*

[Fixed row]

### (9.4) Could any of your facilities reported in 9.3.1 have an impact on a requesting CDP supply chain member?

Select from:

We do not have this data but we intend to collect it within two years

### (9.5) Provide a figure for your organization's total water withdrawal efficiency.

#### (9.5.1) Revenue (currency)

19838

#### (9.5.2) Total water withdrawal efficiency

13.10

### (9.5.3) Anticipated forward trend

Revenue is millions of U.S. dollars. Company total water intensity is expected to decrease moving forward due to water use reduction projects and revenue growth.  
 [Fixed row]

### (9.13) Do any of your products contain substances classified as hazardous by a regulatory authority?

	Products contain hazardous substances	Comment
	Select from: <input checked="" type="checkbox"/> Unknown	Unknown

[Fixed row]

### (9.14) Do you classify any of your current products and/or services as low water impact?

	Products and/or services classified as low water impact	Definition used to classify low water impact	Please explain
	Select from: <input checked="" type="checkbox"/> Yes	Water usage as compared to a baseline unit or alternative equipment	We are currently undergoing EPDs for specific product lines which will provide more insight on the quantification of water impact.

[Fixed row]

### (9.15) Do you have any water-related targets?

Select from:

Yes

**(9.15.1) Indicate whether you have targets relating to water pollution, water withdrawals, WASH, or other water-related categories.**

## **Water pollution**

### **(9.15.1.1) Target set in this category**

Select from:

No, but we plan to within the next two years

### **(9.15.1.2) Please explain**

*Trane Technologies is evaluating the update elements in our EHS Policy to include in a new standalone Water Management Policy. The update is expected to include new elements related to water pollution prevention.*

## **Water withdrawals**

### **(9.15.1.1) Target set in this category**

Select from:

Yes

## **Water, Sanitation, and Hygiene (WASH) services**

### **(9.15.1.1) Target set in this category**

Select from:

No, but we plan to within the next two years

### **(9.15.1.2) Please explain**

*Trane Technologies is evaluating the update elements in our EHS Policy to include in a new standalone Water Management Policy. The update may include WASH program aspects.*

## Other

### (9.15.1.1) Target set in this category

Select from:

Yes

[Fixed row]

### (9.15.2) Provide details of your water-related targets and the progress made.

#### Row 1

### (9.15.2.1) Target reference number

Select from:

Target 1

### (9.15.2.2) Target coverage

Select from:

Organization-wide (direct operations only)

### (9.15.2.3) Category of target & Quantitative metric

Other

Other, please specify :Operate at net water positive for Trane Technologies facilities located in water stressed regions.

### (9.15.2.4) Date target was set

01/01/2020

### (9.15.2.5) End date of base year

### C13. Further information & sign off

(13.1) Indicate if any environmental information included in your CDP response (not already reported in 7.9.1/2/3, 8.9.1/2/3/4, and 9.3.2) is verified and/or assured by a third party?

	Other environmental information included in your CDP response is verified and/or assured by a third party
	Select from: <input checked="" type="checkbox"/> Yes

[Fixed row]

(13.1.1) Which data points within your CDP response are verified and/or assured by a third party, and which standards were used?

#### Row 1

##### (13.1.1.1) Environmental issue for which data has been verified and/or assured

Select all that apply

Climate change

##### (13.1.1.2) Disclosure module and data verified and/or assured

Environmental performance – Climate change

Waste data

Fuel consumption

Renewable fuel consumption

Emissions breakdown by business division

Electricity/Steam/Heat/Cooling generation

Electricity/Steam/Heat/Cooling consumption

- Emissions breakdown by country/area
- Energy attribute certificates (EACs)

- Renewable Electricity/Steam/Heat/Cooling generation
- Renewable Electricity/Steam/Heat/Cooling consumption

### (13.1.1.3) Verification/assurance standard

General standards

- ISAE 3000

### (13.1.1.4) Further details of the third-party verification/assurance process

*Annual limited assurance includes emissions data, waste data, water data, energy data, and health and safety data.*

### (13.1.1.5) Attach verification/assurance evidence/report (optional)

*2024-Assurance-Statement.pdf*

## Row 2

### (13.1.1.1) Environmental issue for which data has been verified and/or assured

*Select all that apply*

- Water

### (13.1.1.2) Disclosure module and data verified and/or assured

Environmental performance – Water security

- Volume withdrawn from areas with water stress (megaliters)
- Water consumption– total volume
- Water withdrawals– total volumes

### (13.1.1.3) Verification/assurance standard

General standards

ISAE 3000

#### (13.1.1.4) Further details of the third-party verification/assurance process

*Annual limited assurance review for water usage for stressed sites as well as all company locations.*

#### (13.1.1.5) Attach verification/assurance evidence/report (optional)

*ERM CVS - Limited Assurance Report for Trane 2024\_Final - 05072025.pdf*

*[Add row]*

**(13.3) Provide the following information for the person that has signed off (approved) your CDP response.**

#### (13.3.1) Job title

*Chief Technology & Sustainability Officer*

#### (13.3.2) Corresponding job category

*Select from:*

Chief Sustainability Officer (CSO)

*[Fixed row]*

**(13.4) Please indicate your consent for CDP to share contact details with the Pacific Institute to support content for its Water Action Hub website.**

*Select from:*

Yes, CDP may share our Disclosure Submission Lead contact details with the Pacific Institute
